A shielded control cable (Icom part # OPC-420) connects the AH-4 tuner to many Icom radios. This cable provides the proper interface (voltage, ground, start and key) from the radio to the tuner. Your description sounds like you have both the AH-4 and the AH-2 ? The AH-4 manual is available on the Icom America web site: www.icomamerica.com

ICOM AH-2B HF mobile whip antennas are antenna element kits for your vehicle. These bumper mount antennas feature a stainless steel antenna element with sufficient strength and flexibility for safe mobile operation, even at high speeds. And when using the AH-2B HF mobile antennas with ICOM antenna tuners--like the AH-4--tuning is automatic.

the AH-2 may be connected to the IC-735 and used in conjunction with the ICOM Communication Interface V (CI-V) system. Please read this instruction manual prior to using your new tuner to obtain a thorough understanding of how to use and enjoy the AH-2 Antenna System. AH-2 is a good remote tuner, it works well with wire antennas of various lengths, tunes on all bands from 160m to 6m, it can also tune a loop or dipole. Currently, the prices of AH-2 on the secondary market are quite attractive. The main advantage of this tuner over AH4 is that it is equipped with an AH-2a control box.
