Papers presented at the National Seminar on Disinvestment Programme in India, held at Jabalpur during 21-22 January 2005.

Arihant has come up with a revised edition of a compendium of over 14000 questions which will significantly improve the knowledge of aspiring students by providing them with ready and reliable practice material for General Studies. The book has been designed for the aspirants preparing for IAS (CSAT), State PCS, CDS, NDA and other competitive examinations. The revised edition of this question bank focuses on Indian History & Culture, India & World Geography (Env & Eco), Indian Polity, Indian Economy, General Science, Science & Technology, General Knowledge and Current Affairs. The book contains the collection of over 14000 questions covering General Studies. The History section covers ancient, medieval and modern history whereas the Geography section covers world geography, Indian geography and environment & ecology. The General Science section covers Physics, Chemistry, Biology and Science & Technology. The questions covered in the book contain answers side by side to help aspirants evaluate themselves after attempting a certain number of questions. Also the questions asked in recent years' General Studies examinations have been provided in the book with authentic and detailed solutions to help aspirants get an insight into the recent examination pattern and the types of questions asked therein. Each chapter in the book contains a variety of questions according to the latest pattern Assertion-Reason, Matching, Multi-Statements, Arrangements, Pairing, etc. Also more than 500 questions based on Current Affairs have been provided in the book to give an additional advantage to the aspirants. As the book contains ample number of objective questions which have been designed for students of various competitive examinations, it for sure will act as the best preparation material for general studies for UPSC (CSAT), State PCS, CDS, NDA, etc.

The revised edition of Business Environment presents a thorough overhaul, updated with the latest information and developments. Having ten new chapters, including comparative study of business environments in India, China, SAARC and European Countries

The book shows that the instant need to feed the teeming millions propelled us to increase the use of chemical fertilizers and adopt better agricultural practices which have created multifaceted problems in agriculture. However, these methods have been killing the natural fertilizing potential of soil. The persistently growing use of external nutrients has enormously raised the cost of farming thus turning agriculture into an unremunerative occupation. Excessive use of chemical fertilizers has also been causing long-term hazards to soil fertility and intensifying the need of subsidy on domestic and imported fertilizers. All these hinder sustainable growth of agriculture. The study also shows that prices of inputs, which farmers have been using, have increased at a much faster rate than those of agriculture output causing impoverishment, in real sense, among them and making agriculture an occupation of last resort.

This report describes the world economic outlook as of April 2018, projecting that advanced economies will continue to expand above their potential growth rates before decelerating, while growth in emerging markets in developing economies will rise before leveling off. It details global prospects and policies, including risks to the forecast, and essential determinants of long-term economic growth: labor force participation in advanced economies, the declining share of manufacturing jobs globally and in advanced economies, and the process through which innovative activity and technological knowledge spread across national borders.

India is not only the world's largest and fiercely independent democracy, but also an emerging economic giant. But to date there has been no comprehensive account of India's remarkable growth or the role policy has played in fueling this expansion. India: The Emerging Giant fills this gap, shedding light on one of the most successful experiments in economic development in modern history. Why did the early promise of the Indian economy not materialize and what led to its eventual turnaround? What policy initiatives have been undertaken in the last twenty years and how do they relate to the upward shift in the growth rate? What must be done to push the growth rate to double-digit levels? To answer these crucial questions, Arvind Panagariya offers a brilliant analysis of India's economy over the last fifty years—from the promising start in the 1950s, to the near debacle of the 1970s (when India came to be regarded as a "basket case"), to the phenomenal about face of the last two decades. The author illuminates the ways that government policies have promoted economic growth (or, in the case of Indira Gandhi's policies, economic stagnation), and offers insightful discussions of such key topics as poverty and inequality, tax reform, telecommunications (perhaps the single most important success story), agriculture and transportation, and the government's role in health, education, and sanitation. The dramatic change in the fortunes of 1.1 billion people has, not surprisingly, generated tremendous interest in the economy of India. Arvind Panagariya offers the first major account of how this has come about and what more India must do to sustain its rapid growth and alleviate poverty. It will be must reading for everyone interested in modern India, foreign affairs, or the world economy.

The key of Managerial Economics is the micro-economic theory of the firm. It lessens the gap between economics in theory and economics in practice. Managerial Economics is a science dealing with effective use of scarce resources. It guides the managers in taking decisions relating to the firm's customers, competitors, suppliers as well as relating to the internal functioning of a firm. It makes use of statistical and analytical tools to assess economic theories in solving practical business problems. Study of Managerial Economics helps in enhancement of analytical skills, assists in rational configuration as well as solution of problems. While microeconomics is the study of decisions made regarding the allocation of resources and prices of goods and services, macroeconomics is the field of economics that studies the behavior of the economy as a whole (i.e. entire industries and economies). The purpose of this study Material is to present an introduction to the subject Managerial Economics of M.Com New Semester pattern syllabus. The book contains the syllabus from basics of the subjects going into the intricacies of the subjects. All the concepts have been explained with relevant examples and diagrams to make it interesting for the readers. An attempt is made here by the experts of TMC to assist the students by way of providing Study Material as per the curriculum with non-commercial considerations. However, it is implicit that these are exam-oriented Study Mate-

rial and students are advised to attend regular lectures in the Institute and utilize reference books available in the library for In-depth knowledge. We owe to many websites and their free contents; we would like to specially acknowledge contents of website www.wikipedia.com and various authors whose writings formed the basis for this book. We acknowledge our thanks to them. At the end we would like to say that there is always a room for improvement in whatever we do. We would appreciate any suggestions regarding this study material from the readers so that the contents can be made more interesting and meaningful. Readers can email their queries and doubts to our authors on tmcnagpur@gmail.com. We shall be glad to help you immediately. Dr. Ajay Nanaji Saratkar, Author Associate Professor, Yashwantrao Gudadhe Patil Memorial College of Arts, Commerce and Science, Nagpur

The Book Will Be Immensely Useful For The Academic, Economic, Political And Social Worlds. It Will Be Of Use For The Planners, Scholars, Researchers And Students Of Economics And Other Social Sciences. It Will Answer Many Questions And Will Raise Further Issues On The Academic And Economic Stage.

The global capitalism has entered into a new and distinct phase, wherein liberalisation, privatisation and globalisation (commonly called LPG) is a central theme. Almost every country, particularly the developing countries, are on the agenda of international monopolies and international financial capital which are controlled and regulated by the industrially developed nations. The vulnerable economies all over the world are being forced to liberalise their economies resulting in unfavourable balance of competitive forces on their side. Free trade rules are dismantling the 'License Raj' meant for business and industry under the dictate of global corporations. Market forces have been given once again a primacy to make the major economic decisions. "The free trade systems of small producers and poor consumers are being dismantled and being made illegal in order to create free trade systems for big business and global corporations." All these have been the outcome of certain policy initiatives and developments that have taken place at the national and international level especially since the 1980s.

Papers presented at the International Conference on "Management of Emerging Paradigm Conflicts in a Globalizing World", held at Bangalore in 2010.

A close interrelationship between management and economics had led to the development of managerial economics. Economic analysis is required for various concepts such as demand, profit, cost, and competition. In this way, managerial economics is considered as economics applied to "problems of choice" or alternatives and allocation of scarce resources by the firms. Managerial economics is a discipline that combines economic theory with managerial practice. It helps in covering the gap between the problems of logic and the problems of policy. The subject offers powerful tools and techniques for managerial policy making. It is in this context, a textbook on introduction to the subject of Managerial Economics is presented to the students of Management program. The book contains the syllabus from basics of the subjects going into the intricacies of the subjects. All the concepts have been explained with relevant examples and diagrams to make it interesting for the readers. An attempt is made here by the experts to assist the students by way of providing case based study material as per the curriculum with non-commercial considerations. However, it is implicit that these are exam-oriented Study Material and students are advised to attend regular class room classes in the Institute and utilize reference books available in the library for In-depth knowledge. We owe to many websites and their free contents; we would like to specially acknowledge contents of website www.wikipedia.com and various authors whose writings formed the basis for this book. We acknowledge our thanks to them. At the end we would like to say that there is always a room for improvement in whatever we do. The present edition of the Textbook in Economics is a thoroughly revised edition. This revised edition meets the requirements of new course structure introduced by the Central Board of Secondary Education (C.B.S.E.). Distinct features of this edition are: ● Based on the New NCERT Textbook ● Based on new examination pattern ● Up-to-date study material with most reliable data ● Comprehensive coverage of the prescribed syllabus ● Language used is easy, simple and lucid ● Includes all important government schemes like: Make in India, Start up India, Skill India, Digital India, Ayushman Bharat, Swachh Bharat Mission, MUDRA Yojana, UDAY Scheme etc. The book has been updated by using the latest information available from government and non government reports, journals and other publications.

The Crisis First In Latin America And Recently In The Economies Of East And South East Asia Has Generated A Lively Discussion On The Benefits And Pitfalls Of The Process Of Liberalisation And Globalisation. It Has Also Led To Questioning Of The More Or Less Uniform Conditionalities And Structural Reforms Prescribed By The I.M.F. And The World Bank For Providing Financial Assistance. The Present Volume Discusses These And Many Other Issues Relating To The Process Of Liberalisation And Globalisation. It Has Paid Special Attention To The Discussion Of The Respective Roles Of The Market And The State In Any Programme Of Rapid Development Without Creating Social Tensions. The Volume Includes Papers Written By Twenty-Two Economists Spread Over The Entire Country. The Response To The First Two Volumes Of The Book Was So Encouraging That It Has Led To The Publication Of The Present Third Volume.
