International Relations and Climate Change degree at Aberystwyth University is key to understanding this complexity and confronting this global crisis. From the individual to the global level action is urgently required.

International Relations and Global Climate Change (Global ...

What international relations theories can explain this and how can they facilitate better cooperation between countries? A global climate change solution has been stuck due to the unwillingness or inability of developed nations like the U.S. to take responsibility of their large share of the past and current greenhouse gas emissions. Reducing emissions in developed countries is not enough, and the weighted action needed cannot be equal between developed and developing nations.
