Toyota Inventory Management | Lean

Manufacturing | Process ...

Just-in-time (JIT) inventory management, also known as lean manufacturing and sometimes referred to as the Toyota production system (TPS), is an inventory strategy that manufacturers use to increase efficiency. The process involves ordering and receiving inventory for production and customer sales only as it is needed to produce goods, and not before.

INVENTORY CONTROL BY TOYOTA PRODUCTION SYSTEM KANBAN METHODOLOGY—A CASE STUDY V M Nistane^{1*} and Srinivas Viswanath V¹ *Corresponding Author: V M Nistane, In this paper, a single-item, multi-stage, sequential production system is considered. Materials in the system are controlled by Kanban discipline.

Inventory will be kept in control according to monthly plan with keen control of KANBAN methodology. When using Kanban discipline, a workstation has a fixed number of Kanbans

Toyota Production System - Wikipedia

The Toyota Production System (TPS) is an integrated socio-technical system, developed by Toyota, that comprises its management philosophy and practices. The TPS is a management system that organizes manufacturing and logistics for the automobile manufacturer, including interaction with suppliers and customers. The system is a major precursor of the more generic "lean manufacturing".
