ISO 31000 - Wikipedia

The ISO 31000 risk management standard can be adopted by organizations of any size and industry, but is not used for certification purposes. It only aims to be used as a guide to help businesses compare their practices with a benchmark risk management standard by the ISO.

IEC 31010:2019 is published as a double logo standard with ISO and provides guidance on the selection and application of techniques for assessing risk in a wide range of situations. The techniques are used to assist in making decisions where there is uncertainty, to provide information about particular risks and as part of a process for managing risk.

ISO 31000 aims to simplify risk management into a set of clearly understandable and actionable guidelines, that should be straightforward to implement, regardless of the size, nature, or location of a business. Risk for ISO 31000 is defined as "the effect of uncertainty" on business objectives. This effect can be both positive or negative.
