This book showcases issues of work and employment in contemporary India through a critical lens, serving as a systematic, scholarly and rigorous resource which provides an alternate view to the glowing metanarrative of the subcontinent's ongoing economic growth in today's globalized world. Critical approaches ensure that divergent and marginalized voices are highlighted, promoting a more measured perspective of entrenched standpoints. In casting social reality differently, a quest for solutions that reshape current dynamics is triggered. The volume spans five thematic areas, subsuming a range of eco-

nomie sectors. India is a pre-eminent destination for offshoring, underscoring the relevance of global production networks (Theme 1). Yet, the creation of jobs has not transformed employment patterns in the country but rather accentuated informalization and casualization (Theme 2). Indeed, even India's ICT-related sectors, perceived as mascots of modernity and vehicles for upward mobility, raise questions about the extent of social upgrading (Theme 3). Nonetheless, these various developments have not been accompanied by collective action - instead, there is growing evidence of diminished pluralistic employment relations strategies (Theme 4). Emergent concerns about work and employment such as gestational surrogacy and expatriate experiences attest to the evolving complexities

associated with offshoring (Theme 5).

"The Home and the World" is a love story and a novel of political awakening. The story tells about Bimala, an Indian woman and political activist, torn between the duties owed to her husband, Nikhil, and the demands made on her by the radical leader, Sandip. Her attempts to resolve these pressures of domestic and civil life reflect the conflict in India during the period of partition.

A rare diamond disappears. Who took it? Could it be the Hindoos who vowed to return it to the Moon God from which it was stolen years ago?

First published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

In Strategic Management: Theory and Practice, Fourth Edition, John A. Parnell leads readers through detailed, accessible coverage of the strategic management field. Concise and easy to understand chapters address concepts sequentially, from external and internal analysis to strategy formulation, strategy execution, and strategic control. Rather than relegating case analysis to a chapter at the end of the book,

Parnell aligns each chapter's key concepts with 25 case analysis steps. Current examples and high interest real-time cases, largely drawn from The Wall Street Journal and Financial Times, illustrate the key role of strategic management in the United States and around the world.

Anyone who wishes to understand what has happened in India in the twentieth century - politically and culturally - must read Nirad C. Chaudhuri. Among her men of letters he is unique; for the fertility of his mind and the polymathic range of his interests, as well as for the lucidity of his prose and his sheer integrity. — Geoffrey Moorhouse (Chaudhuri) has spent a lifetime kicking against the myths and shibboleths held by the majority of his fellow countrymen: he has ridiculed the pacifism of Mahatma Gandhi...he has castigated Indian nationalism for being corrupt, self-seeking, and destructive... (he has) vented his spleen at the stupidity and philistinism of the British in India. His latest (book) is almost a thousand pages long. It testifies to (his) eloquence, wit, and intellectual brilliance that he can go on at such length with-

out once becoming a bore. — Ian Buruma, The New York Review of Books Secrets or Death. In this collection of true stories, American scholar Farhana Qazi reveals why women keep secrets to survive another day of conflict. She meets with political activists, protestors and peacemakers to understand their emotional loss and love for Kashmir. Despite the chronic social suffering, these women fight to survive against all odds. These stories are the hidden truths of the valley.

Ramachandra Guha's *India after Gandhi* is a magisterial account of the pains, struggles, humiliations and glories of the world's largest and least likely democracy. A riveting chronicle of the often brutal conflicts that have rocked a giant nation, and of the extraordinary individuals and institutions who held it together, it established itself as a classic when it was first published in 2007. In the last decade, India has witnessed, among other things, two general elections; the fall of the Congress and the rise of

Narendra Modi; a major anti-corruption movement; more violence against women, Dalits, and religious minorities; a wave of prosperity for some but the persistence of poverty for others; comparative peace in Nagaland but greater discontent in Kashmir than ever before. This tenth anniversary edition, updated and expanded, brings the narrative up to the present. Published to coincide with seventy years of the country's independence, this definitive history of modern India is the work of one of the world's finest scholars at the height of his powers.

Autobiographical accounts, travel sketches, and reminiscences, many of them reprints of former magazine articles.

This is a comprehensive, intelligible and interesting portrait of Ancient Indian History and Civilization from a national historical point of view. The work is divided into three broad divisions of the natural course of cultural development in Ancient India: (1) From the prehistoric age to 600 B.C., (2) From 600 B.C. to 300 A.D., (3) From 300 A.D. to 1200 A.D. The work describes the political, economic, religious and cultural conditions of the country, the expansionist activities, the colonisation schemes of her rulers in the Far East. Political theories and administrative organizations are also discussed but more stress has been laid on the religious, literary and cultural aspects of Ancient India. The book is of a

more advanced type. It would meet the needs not only of general readers but also of earnest students who require a thorough grasp of the essential facts and features before taking up specialized study in any branch of the subject. It would also fulfil requirements of the candidates for competitive examinations in which Ancient Indian History and culture is a prescribed subject.

A top scientist is falsely accused of selling space technology secrets. A police inspector's misadventure with a Maldivian woman results in a fabricated espionage case. A faction within a political party capitalises on the case to bring down a government. An intelligence agency obligingly plays into the hands of vested interests to slow down India's space programme. And a complex investigation finally proves the allegations untrue. In this riveting book, Isro scientist S Nambi Narayanan - who was falsely accused of espionage in ISRO spy case of the 1990s - and senior journalist Arun Ram meticulously unpick the ISRO spy case, revisit old material and discover new details to expose the international plot that delayed India's development of a

cryogenic engine by at least a decade. It took four years for the CBI to exonerate Nambi, but his fight for justice to ensure action against the officers who faked the case and tortured him in custody continues. This book is as much a history of the early days of India's ambitious space programme as it is a record of one of the most sensational cases that enthralled the nation long before the era of on-line updates and 24-hour news cycles.

From a country plagued with chronic food shortage, the Green Revolution turned India into a food--grain self-sufficient nation within the decade of 1968-1978. By contrast, the decade of 1995-2005 witnessed a spate in suicides among farmers in many parts of the country. These tragic incidents were symptomatic of the severe stress and strain that the agriculture sector had meanwhile accumulated. The book recounts how the high achievements of the Green Revolution had overgrown to a state of this 'agrarian crisis'. In the process, it also brings to fore the underlying resilience and innovativeness in the sector which enabled it not just to survive through the crisis but to evolve and revive out of it. The need of the hour is to create an environment that will enable the sector to acquire the robustness to contend with the challenges of lifting levels of farm income and coping with Climate Change. To this end, a multi-pronged intervention strategy has been suggested. Reviving public investment in irriga-

tion, tuning agrarian institutions to the changed context, strengthening of market institution for better farm-market linkage and financial access of farmers, and preparing the ground for ushering in technological innovations should form the major components of this policy paradigm.

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. ic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. A History of the Indian Novel in English traces the development of the Indian novel from its beginnings in the late nineteenth century up until the present day. Beginning with an extensive introduction that charts important theoretical contributions to the field, this History includes extensive essays that shed light on the legacy of English in Indian writing. Organized thematically, these essays examine how English was "made Indian" by writers who used the language to address specifically Indian concerns. Such concerns revolved around the question of what it means to be modern as well as how the novel could be used for anti-colonial activism. By the 1980s, the Indian novel in English was a global phenomenon, and India is now the third largest pub-

lisher of English-language books. Written by a host of leading scholars, this History invites readers to question conventional accounts of India's literary history.

This is the story of Nataraj, who earns his living as a printer in the little world of Malgudi, an imaginary town in South India. Nataraj and his close friends, a poet and a journalist, find their congenial days disturbed when Vasu, a powerful taxidermist, moves in with his stuffed hyenas and pythons, and brings his dancing-women up the printer's private stairs. When Vasu, in search of larger game, threatens the life of a temple elephant that Nataraj has befriended, complications ensue that are both laughable and tragic.

Born in a middle class trading family, Kishore Biyani started his career selling stonewash fabric to small shops in Mumbai. Years later, with the launch of Pantaloons, Big Bazaar, Food Bazaar, Central and many more retail formats, he redefined the retailing business in India. Incidentally, Kishore Biyani's objective is to capture every rupee in the wallet of every Indian consumer, wherever they are - an investment banker liv-

ing in a south Mumbai locality or a farmer in Sangli. As large business houses enter the retail space, Kishore Biyani is not just concentrating on retail but aiming to capture the entire Indian consumption space. From building shopping malls, developing consumer brands to selling insurance, he is getting into every business where a customer spends her money.

A comprehensive assessment of how trade complementarities and agreements help facilitate trade in services between India and the European Union. A first of its kind, it addresses policy initiatives on services trade between two economies that are actively engaged in trade agreements. It establishes that the Broad Based Trade and Investment Agreement (BTIA), if signed, will be India's first agreement with a major advanced regional bloc and a major trading partner, and the EU's first agreement with a large emerging market. It is, therefore, likely to have a far-reaching impact on other large trading nations such as the United States and China. This book will be indispensable to scholars of international trade, international economics, macroe-

conomics, international relations as well as policy-makers, policy analysts and the informed general reader.

This anthology testifies to women's many concerns, whether with a way of life, or with being caught inside the four walls of the home, or in a relationship with someone other than the husband, or being caught at the intersection of many forces within a situation of political violence and armed conflict. In one

way or another the woman's body becomes a site upon which many battles take place; for control, for power, for progeny, but there is seldom a resolution in which the woman remains a mere victim, or more acted upon than acting. Whether she is in the palaces of the gods, or caught in the body of snake, or speaking through the spirit of the countryside which witnessed her rape, the woman's voice is unique, singular and in each story, different. While this gives substance to the cliché that India is a country where many and varied realities exist simultaneously, it gives the lie to the cliché that all women speak with a sameness and a commonality of experiences.

Growth miracles typically have been studied at the country level. In *The Making of Miracles in Indian States*, internationally-renowned economists Arvind Panagariya and M. Govinda Rao bring together a team of six leading scholars to break from that tradition and study three growth miracles in India at the level of the state: Andhra Pradesh, Bihar, and Gujarat. These are three large and diverse states in India: Gujarat has the third-highest

per-capita income among the largest eighteen states, Bihar is the poorest, and Andhra Pradesh falls in the middle. Despite vast differences among the states, all three have grown at rates exceeding 8% for an entire decade in the twenty-first century. Each section of this three-part book offers a historical perspective on the state's development and the specific factors that improved its economic fortunes. The three case studies are backed by extensive quantitative documentation. They demonstrate the critical role that leadership, translated into improved policies and implementation, plays in stimulating growth and development. *The Making of Miracles in Indian States* is essential reading for students and scholars alike, as well as policy makers, NGO workers, and employees of international institutions.

Higher education is vital to India's future, creating democratic citizens and a modern economy, building communities and cities and conducting research the country needs to continue its advance. Yet, with two thirds of people of India living in rural areas and urban incomes below the world average, in a culturally diverse country, the tragic effects of the Covid-19 pandemic and profound problems of regional, social and gender inequalities, higher education faces many challenges. This book brings together experts and emerging researchers from India and the UK to discuss these issues and to explore positive solutions. The team shine the spotlight on financing and funding, governance and regulation, sector organisation and institutional classification, equity and

social inclusion, the large and poorly regulated private sector, Union-State relations in higher education, student political activism, and internationalisation.

The relationship of the Nuclear Non-Proliferation Treaty with India has been an interesting subject in the field of security studies. The nuclearisation of India and its subsequent rise are further forcing the world to redefine its relationship with the treaty. However, the international response is quite mixed. The old mindset still thinks that India may join the treaty as a Non-Nuclear Weapon State. Scholars appear divided whether India should join the treaty as a nuclear weapon country. The book discusses current crises of the Nuclear Non-Proliferation Treaty which are going to figure in the 2010 Review Conference of the

treaty. This book was published as a special issue of *The Strategic Analysis*.

‘Global politics, as the name suggests, investigates the political concepts of power, equality, sustainability, and peace methods at a variety of levels. These investigations are vital for the well-being of a country.’

There's more to Milind Soman than meets the eye (although, as his legions of female fans will agree, what meets the eye is pretty delish). Combining in himself the passion of an entrepreneur, the mind of a nerd, the discipline of an athlete, the curiosity of an explorer, the heart of a patriot and the soul of a philosopher, Milind has made the stunning-and apparently seamless- transition from champion swimmer to supermodel to actor to extreme sportsper-

son to women's fitness activist, enabler and proselytiser, all in one lifetime. How does he do it? What makes him tick? On the twenty-fifth anniversary of 'Made in India', the breakout pop music video of the 1990s that captured the apna-time-aagaya zeitgeist of post-liberalization India and made him the nation's darling across genders and generations, Milind talks about his fascinating life-controversies, relationships, the breaking of vicious habits like smoking, alcohol, rage, and more-in a freewheeling, bare-all (easy, ladies-we're talking soul-wise!) memoir. Co-authored with bestselling author Roopa Pai, *MADE IN INDIA* is a rare glimpse into the mind and heart of a very unusual man that will leave you thoughtful, awed and inspired.
