JUNIPER TIME is a panaramic and hauntingly beautiful novel of the survival of hu-

mankind and nature. Drought has devastated the western U.S. and the people migrate eastward to settle in squalid concentration camps called Newtowns .

The seed maturation time varies between species from 6 to 18 months after pollination. The male cones are similar to those of other Cupressaceae, with six to 20 scales. In zones 7 through 10, junipers can bloom and release pollen several times each year.
