Bond Skills Arithmetic for age 10-11 Stretch follows on from Bond Skills Arithmetic for age 8-9, 9-10 and 10-11 years, stretching 10-11 year olds further in these core arithmetic skills to prepare them for success in key exams. Bond brings its 50+ years of experience in helping children to develop the skills needed to succeed. This title focuses on this particular area of the maths curriculum to develop the fluency with arithmetic demanded at higher levels of SATs and for success in the 11+ and Common Entrance tests.

The format of Mental Arithmetic differs from that of traditional mental arithmetic materials in that pupils read the questions themselves, use rough paper for workings out, and write down their answers. It provides intensive practice in all

areas of the maths curriculum.

Provides explanations of key maths basics studied in the first three years of Primary school. This book contains pictures and diagrams. It is useful for parents to work through with their children at home.

This Bond SATs Skills English Practice Test Paper Pack has been created by Bond to prepare children for National Curriculum Key Stage 2 SATs assessments at the end of Year 6 in primary school. It includes two full sets of English tests, including all of the papers children will sit as part of their English assessment.

A creative and fun approach to math (and problem solving) for children who love hands-on learning This fill-in book helps children to think like mathematicians by introducing key mathematical concepts in a highly visual—and entertaining—way. Through fun activities and illustrations, This Book Thinks You're a Math Genius encourages young readers to engage with new ideas by experimenting and investigating for themselves. This Book Thinks You're a Math Genius explores seven key areas of math: geometry, space and volume, statistics, numbers and number patterns, codes and ciphers, and the concept of infinity. Each spread centers on an open-ended question that introduces a key mathematical concept and suggests activities that engage the child in a fun way. Activities include reading minds with math, having a eureka moment, and playing mathematical guess who. The end of the book includes a section of paper-based crafts. This creative approach, along with Russell's wonderfully humorous hand-drawn illustrations, make math fun and accessible for children.
