Learning And Teaching Secondary Science

Learning to Teach Science in the Secondary School is designed to support student teachers through the transition from graduate scientist to practising science teacher, while achieving the highest level of personal and professional development.

Chapter 13: EFFECTIVE LEARNING AND TEACHING. Although Science for All Americans emphasizes what students should learn, it also recognizes that how science is taught is equally important. In planning instruction, effective teachers draw on a growing body of research knowledge about the nature of learning and on craft knowledge about teaching that has stood the test of time.

Learning And Teaching Secondary Science

Key principles that define teaching and learning in secondary science in TLTE include: A view of science teaching that incorporates cognitive, social, and cultural factors. A focus on the nature of science, scientific thinking, and problem solving as they are integrated in school, community, and work practices.
