Sixteen-year-old Cassie is appalled, then ashamed to learn that her widowed mother is going to be a surrogate mother, but with the help of friends, she begins to understand that it is every woman's right to make her own decisions.

Introduces the learner to a range of Arabic vocabulary grouped according to subject, including items within the home and school, animals, shapes, fruit and vegetables, and others. This work also provides learners with a basic knowledge of Arabic grammar, enabling them to take their first

steps in understanding and using non-verbal sentences.

Lesson study is a professional development process that teachers engage in to systematically examine their practice, with the goal of becoming more effective. Originating in Japan, lesson study has gained significant momentum in the mathematics education community in recent years. As a process for professional development, lesson study became highly visible when it was proposed as a means of supporting the common practice of promoting better teaching by disseminating documents like standards, benchmarks and nationally validated curricula. While the body of knowledge about lesson study is growing, it remains somewhat elusive and composed of discrete research endeavors. As a new research area there is no coherent knowledge base yet. This book will contribute to the field bringing the work of researchers and practitioners together to create a resource for extant work. This book describes several aspects of Lesson Study, amongst others: it gives an

historical overview of the concept, it addresses issues related to learning and teaching mathematics, it looks at the role of the teacher in the process. The last two sections of the book look at how lesson Study can be used with preservice mathematics teachers and at university mathematics methods teaching.
