In the summer of 1949 fifteen smokejumpers parachuted into a remote Montana canyon called Mann Gulch. It started as a very small fire in rugged country but within two hours after landing, thirteen of these young men were caught in a raging inferno and were killed. They died bravely, together with their friends, and in the service of their country. Everyone was young and attractive, healthy and strong, enthusiastic and in love. They were bursting into the prime of their lives. There were no malcontents here. Everyone did their best but events overtook them. Until now the actual time line has never been connected to the people involved. Fire in Montana connects the lives of young smokejumpers who lived with a joy of life and expectations of shining futures, the forest rangers and volunteers who fought valiantly to rescue them, and their families, lovers, and friends who were forced to wait and pray, then face the devastating and heart wrenching loss.

The acclaimed author of *Strategic Capitalism* presents a provocative new vision of global industry in the age of 3-D printing: "essential business reading" (Kirkus, starred review). With books like *Hypercompetition* and *Strategic Capitalism*, Richard D'Aveni has established himself as a business strategist of uncanny prescience. In *The Pan-Industrial Revolution*, he demonstrates how the advent of industrial-scale 3-D printing is already happening under the radar, and that it will have a far-reaching impact that most corporate and governmental leaders have yet to anticipate or understand. 3-D printing, now called additive manufacturing, has moved far beyond a desktop technology used by hobbyists to churn out trinkets and toys. In this eye-opening account, D'Aveni reveals how recent breakthroughs have been secretly adapted by Fortune 500 companies to revolutionize the manufacture jet engines, airplanes, automobiles, and so much more. D'Aveni explains how this technology will transform the landscape of manufacturing, and the dramatic effect this change will have on the world economy. A handful of massively powerful corporations—what D'Aveni calls pan-industrials—will become as important as any tech giant in re-structuring the global order.

As humanity struggles with the aftermath of a century-long vampiric bloodbath, life outside the remaining great cities revolves around being inside by sunset and never questioning the status quo. Aurora Strong is practically a pariah in her village thanks to her mother's infamous involvement with vampires -- not to mention her own inability to play by the rules. Not content with being a mere social outcast, Rory conspires in a secret, and very illegal, blood brokering scheme. She enjoys her private rebellion against the town that shuns her -- until her partner in crime goes missing, and suddenly it's not about her anymore. Now, with her partner either enslaved as a living blood bank or already dead, Rory's illicit blood brokering contacts are her only hope of making things right. Assuming they allow her to leave...or even to live.

This book deals with the new method of laser-driven acceleration for application to radiation biophysics and medicine. It provides multidisciplinary contributions from world leading scientist in order to assess the state of the art of innovative tools for radiation biology research and medical applications of ionizing radiation. The book contains insightful contributions on highly topical aspects of spatio-temporal radiation biophysics, evolving over several orders of magnitude, typically from femtosecond and sub-micrometer scales. Particular attention is devoted to the emerging technology of laser-driven particle accelerators and their application to spatio-temporal radiation biology and medical physics, customization of non-conventional and selective radiotherapy and optimized radioprotection protocols.

Android Wireless Application Development has earned a reputation as the most useful real-world guide to building robust, commercial-grade Android apps. Now, authors Lauren Darcey and Shane Conder have systematically revised and updated this guide for the latest Android SDK 4.0. To accommodate their extensive new coverage, they've split the book into two volumes. Volume I focuses on Android essentials, including setting up your development environment, understanding the application lifecycle, designing effective user interfaces, developing for diverse devices, and optimizing your mobile app development process—from design through publishing. Every chapter has been thoroughly updated for the newest APIs, tools, utilities, and hardware. All sample code has been overhauled and tested on leading devices from multiple companies, and many new examples have been added. Drawing on decades of in-the-trenches experience as professional mobile developers, Darcey and Conder provide valuable new best practices—including powerful techniques for constructing more portable apps. This new edition contains full chapters on Android manifest files, content providers, effective app design, and testing; an all-new chapter on tackling compatibility issues; coverage of today's most valuable new Android tools and utilities; and even more exclusive tips and tricks. An indispensable resource for every Android development team member.

As Linux continues its rapid expansion into Corporate America, the demand for qualified administrators has grown. As the Cisco, Microsoft, A+ and other certifications have shown, professional certifications are often a deciding factor when an individual is considered for a job. The Linux Professional Institute Certification 1 offers the validation of skill level beyond the power-user and helpdesk level, at an entry-level admin base. LPIC 1 Certification Bible is organized around the exam objectives. It includes self-assessment questions with each chapter as well as an inclusive practice exam at the end of the book. Plus, you'll find plenty of exam-taking tips and hints based on the live exams. Covers: Exam LPI-101
