A pocket-sized manual for preparing nursing students for the medications questions asked on the NCLEX-RN. Nursing students are more concerned about medications than about any other subject on the NCLEX, and this book provides the answers. Organized by drug class, this valuable guide lists over 300 drugs that you students may be asked about on the NCLEX. Each drug comes with detailed information on its side effects and nursing considerations. Best of all, it addresses those aspects of medications that are specifically emphasized noted on the NCLEX test plan.

This study guide contains approximately 400 multiple-choice questions with detailed answer explanations. The book is illustrated with anatomical images, clinical images that portray signs and symptoms, and radiological images including ultrasounds, PET scans, MRIs, CT scans, and X-rays.

Quality Assurance (QA) is an integral and very important part of laboratory medicine. Pathologists, microbiologists, biochemists

and laboratory technicians all need to be proficient in this subject. QA is also mandatory for obtaining accreditation, which ensures a certain level of quality in services being provided. The subject of Quality Assurance (QA), though not new, is a relatively neglected entity and is looked at with some degree of apprehension. This book is addressed to those entrusted with implementing Quality Assurance (QA) in laboratory medicine; generally, these are persons with basic training as pathologists. This handbook is meant as a beginner and handy guide to Quality Assurance; all the basics of Quality Assurance have been incorporated to encourage the beginner to make a start.

Quality refers to the amount of the unpriced attributes contained in each unit of the priced attribute. Leffler, 1982 Quality is neither mind nor matter, but a third entity independent of the two, even though Quality cannot be defined, you know what it is.
