In response to the coronavirus disease 2019 (COVID-19) pandemic and the societal disruption it has brought, national governments and the international community have invested billions of dollars and immense amounts of human resources to develop a safe and effective vaccine in an unprecedented time frame. Vaccination against this novel coronavirus, severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), offers the possibility of significantly reducing severe morbidity and mortality and transmission when deployed alongside other public health strategies and improved therapies. Health equity is intertwined with the impact of COVID-19 and there are certain populations that are at increased risk of severe illness or death from COVID-19. In the United States and worldwide, the pandemic is having a disproportionate impact on people who are already disadvantaged by virtue of their race and ethnicity, age, health status, residence, occupation, socioeconomic condition, or other contributing factors. Framework for Equitable Allocation of COVID-19 Vaccine offers an overarching framework for vaccine allocation to assist policy makers in the domestic and global health communities. Built on widely accepted foundational principles and recognizing the distinctive characteristics of COVID-19, this report's recommendations address the commitments needed to implement equitable allocation policies for COVID-19 vaccine.

A flagship publication of the Ministry of Agriculture, this is an authentic source of data on various facets of the agriculture and allied sector. It gives a comprehensive picture of Indian agriculture by presenting statistical data across states and time periods, covering diverse aspects, such as crop production and productivity, land use, agricultural inputs, terms of trade, price support and procurement, domestic and international trade, rainfall, credit and insurance. Though primarily based on data being continuously generated by the Ministry of Agriculture through a nation-wide agricultural data collection system and from various other central and state government Departments, the 2014 edition includes key indicators of Situation Assessment Survey of Agricultural Households 2013, made public in December 2014.

This book examines the production, procurement and marketing aspects of the organic produce sector with the focus on marketing agencies and producers in each commodity/product chain. It analyses the various institutional arrangements like contract farming, networking and producer level co-ordination prevalent in this sector. Based on case studies of various type of organic players in India, both in export market as well as in domestic market.

With the liberalization of the Indian economy, the insurance sector has opened up, and a lot of new players, both multinationals and Indian companies with foreign collaboration, have entered this arena realizing the vast potential in life insurance. A basic knowledge of life insurance has therefore become essential for the students opting for this course as well as for the practitioners. With this view in mind, Dr. Kutty gives in this text a masterly analysis and a holistic view of every dimension of life insurance management in the sequence of 6Ps—purpose, principles, purchase, products, process and people, in an easy to understand language. He strives to demystify the complex world of life insurance and present its fundamentals to all the readers. Based on the author's rich experience in insurance sector over the two decades, the text provides new research insights in the areas such as product comparisons, e.g. portfolio approach to purchase of life insurance. It covers the actuarial dimensions of life insurance, with the minimum use of mathematics. Besides, the text discusses in detail the two core operations of an insurance company—underwriting and claims. The hallmark of this book is its attempt to transform the way marketing and operations in life insurance are approached and its sure guidance on how a professional should approach and manage sales, service, process and people. Key Features □ Separate chapters are devoted to topics such as general insurance, risk management, underwriting, claims and financial management. □ The nature of contracts in general

and life insurance contracts in particular is explained. □ Different traditional insurance products such as term insurance and non-conventional products like unit-linked policies are dealt with in detail. This book is primarily designed for students of management, commerce and those pursuing specific insurance courses. It can also be profitably used by industry practitioners. Finally, the book will be invaluable to managers of Life Insurance companies, Banks (engaged in Bancassurance), and Security firms.

1903. Thomas Nelson Page, author of short stories, novels, essays, and poetry, is best known for his role as literary spokesman for the glories of the Old South. Gordon Keith begins: Gordon Keith was the son of a gentleman. And this fact, like the cat the honest miller left to his youngest son, was his only patrimony. As in that case also, it stood to the possessor in the place of a good many other things. It helped him over many rough places. He carried it with him as a devoted Romanist wears a sacred scapular next to the heart. See other titles by this author available from Kessinger Publishing. This book provides essential information on metal forming, utilizing a practical distinction between bulk and sheet metal forming. In the field of bulk forming, it examines processes of cold, warm and hot bulk forming, as well as rolling and a new addition, the process of thixoforming. As for the field of sheet metal working, on the one hand it deals with sheet metal forming processes (deep drawing, flange forming, stretch drawing, metal spinning and bending). In terms of special processes, the chapters on internal high-pressure forming and high rate forming have been revised and refined. On the other, the book elucidates and presents the state of the art in sheet metal separation processes (shearing and fineblanking). Furthermore, joining by forming has been added to the new edition as a new chapter describing mechanical methods for joining sheet metals. The new chapter "Basic Principles" addresses both sheet metal and bulk forming, in addition to metal physics, plastomechanics and computational basics; these points are complemented by the newly added topics of metallography and analysis, materials and processes for testing, and tribology and lubrication techniques. The chapters are supplemented by an in-depth description of modern numeric methods such as the

finite element method. All chapters have been updated and revised for the new edition, and many practical examples from modern manufacturing processes have been added.
