In the CRAFTA education, cranial manual therapy is defined as: the assessment and treatment of the cranium (head) and the face with passive movements (movements executed by the therapist). During the examination, three parameters are examined: resistance, rebound and sensory response:

CranioSacral Therapy is a gentle, noninvasive manual therapy that detects and modifies restrictions in the cranosacral system as well as strain patterns throughout the body. Of course, it is essential to remember that neither massage therapists nor

CranioSacral therapists diagnose or treat; however, the therapist may be in a place to address such a condition if on a medical team or the recipient of a referral.

CranioSacral therapy is a gentle manual therapy that uses a light touch. By using light touch it helps inhibit the Sympathetic Nervous System and activate the Parasymp-

pathetic Nervous System (PNS). The PNS is the body's rest and restore state. Most people are unable to reach that state on their own.

Manual Therapy for the Cranial Nerves will make you aware of the brain as the primary target of your action as practitioner. The brain, although protected by cerebrospinal fluid, is sensitive to all variations in pressure. In this text you will find ways for modifying intra-cranial pressure, which has vascular and cerebral consequences. - To function at its best, the brain requires malleability and plasticity. By manually modifying intra-cranial pressure, we obtain promising effects on the ...

CranioSacral Therapy (CST) is a gentle hands-on, non-invasive manual therapy. This full body approach uses minimal pressure to avoid the natural guarding effect of the body. The low pressure is designed to be respectful and negotiate with the body. [Download Manual Therapy for the Cranial Nerves PDF ...](#)

In our book, Manual Therapy for the Peripheral Nerves, we underlined the importance of soliciting the body's proprioceptive responses through manual therapy.

This is because all tissues are endowed with a system of mechanoreceptors connected to the cerebellum and the thalamus, and it is through their agency that we obtain both local and general results. Cranial nerves supply sensitivity to the bone, periosteum, sutures and meninges. Thus, central to obtaining an effect on the dura mater ...
