With the emergence of urban and community forestry as the fastest growing part of our profession in the last 15 years, the need for a book such as this inevitably developed. The Society of American Foresters' urban forestry working group counts 32 or more universities now offering courses in this subject, and the number is growing. For the last several years I have coordinated a continuing education urban forestry course at Rutgers for nonmatriculated students. Registrants have included arborists, shade tree commissioners, landscape architects, city foresters, environmental commissioners, park superintendents, and others whose jobs involve care and management of trees. The course was started by Bob Tate in 1980, around a core of managerial subjects such as inventories, budgets, and public relations. After Bob left in 1984 to join Asplundh and later to start his own prosperous business in California, the course languished after it exhausted the local market for those subjects.

Among the first titles published in 1978, with more than 150,000 copies in print in three editions, *Japanese Maples* is a Timber Press classic. Japanese maples are unlike any other tree. They boast a remarkable diversity of color, form, and texture. As a result of hundreds of years of careful breeding, they take the center stage in any garden they are found.
