Terrain map. Contours are imaginary lines that join points of equal elevation. Contours lines make it possible to determine the height of mountains, depths of the ocean bottom, and steepness of slopes. Elevation values are printed along the lines. Contour lines that are close together indicate steep slopes.

The map on the bottom of this page is a terrain relief image of the world with the boundaries of major countries shown as white lines. It includes the names of the world's oceans and the names of major bays, gulfs and seas. Lowest elevations are shown as a dark green color with a gradient from green to dark brown to gray as elevation increases.
