Washers & Dryers | Maytag

Now you can do run a Maytag Centennial automatic diagnostic washer cycle. You will need to start the diagnostics mode again, but this time turn the Centennial washer's cycle knob right until only the "spin" light is lit and press "start". The washer will do a quick cycle that will test all the washer functions.

The Maytag Centennial washer's tub is suspended on 4 suspension rods located on the outer corners of the washer's tub. The spring portion of these tub suspension rods have been known to become soft and allow the tub to bounce, leading to the washer regularly going off balance and banging the inside of the washer during spin.
