**M1 M2...or A level physics Mechanics modules for ...**

Should I go through the mechanics modules in physics or should I try and do some mechanics maths modules? If you think 'A' physics route, what board do you think is the hardest? Would I be able to JUST read the mechanics modules and understand it? If you think maths mechanics modules, how many of them would you say I should do?

**Mechanics: Modules M1, M2, Solutions for January 1999 of ...**

**Prerequisite Knowledge - Mechanics M1**

- The F2e and F2 Series modules cannot exist with the F1 Series module in a VDC.
- A new VDC type, F2E, supports only F2e Series modules, but can be added to other

VDC types to allow F2E to be part of the same VDC with F2 modules, or M1 or M2 Series modules. An F2e Series module and any M Series module can be configured in the same VDC.

All modules have four modifications, each of which has a fixed amount of resistance: M0 - 10%, M1 - 15%, M2 - 25% and M3 - 35%. When fully upgraded, each modification bears the protection value of the next tier, while the maximum protection that can be achieved is 50%, acquired when fully upgrading an M3 module.
