94 Meta-Ethnography ethnography is the synthesis of interpretive research. To preserve the uniqueness and holism that character-

ize qualitative studies, we argue that one form of meta-ethnography involves the translation of studies into one another. The translation of studies takes the form of an anal-ogy between and/or among the studies.

Noblit and Hare propose a new method for synthesizing from qualitative studies: meta-ethnography. After citing the criteria to be used in comparing qualitative research projects, the authors define the ways these can then be aggregated to create more coherent syntheses of research.
