S12NFY - DARRYL RAYMOND

A comprehensive, user-friendly guide to marriage and family therapy that takes a holistic view to look at people within the context of their environment. Family Therapy helps students understand the process of shifting from an individual psychology paradigm to a cybernetic or systems paradigm. The text is divided into three sections: "The Systemic Framework," "The Practice of Family Therapy," and "The Systemic Practitioner," and it includes historical information, current developments, and ongoing debates. Various family and developmental theories are examined. The family therapy models considered include psychodynamic, natural systems, experiential, structural, communications, strategic, behavioral/cognitive, and several post-modern approaches. Assessment, intervention, training and supervision, research, and epistemological challenges are discussed within the context of practice. Learning Goals Upon completing this book readers will be able to: Describe and compare various family therapy models Discuss practical applications for different family and developmental theories Review and assess unique family systems to determine the appropriate family therapy model Understand how concepts with the same name differ in meaning at different levels (i.e. 1 st order versus 2 nd order cybernetics)

Money Talks explores the ways the financial concepts of money and capital are understood and talked about by a range of people, from traders to ordinary investors, and how these accounts are framed and represented across a range of media. This collection brings together leading writers and emerging researchers to demonstrate how work in media and cultural studies can contribute to debates around the meanings of money, the operations of capital and the nature of the current crisis. Drawing on a range of work from across disciplines, Money Talks offers a provocative and path-breaking demonstration of the value of incorporating approaches from media and cultural studies into an understanding of economic issues.

Conveyancing is designed for law students and new lawyers studying applied land law on the Irish Professional Practice Course. As the fourth edition is published at a time when major reform and modernisation of land law and conveyancing is proposed, the text has been fully revised and updated to include reference to proposed reforms, recently published bills and new legislation enacted. This includes new coverage on the Land Act 2005, the Title Act 2006 and the fundamental changes proposed by the Land and Conveyancing Law Reform Bill 2006. In two volumes, the fourth edition also features updated sample documentation and precedents to enable students to consider the procedural aspects of conveyancing. It includes complete coverage of all the essential knowledge needed when practicing conveyancing, including the legal concept of property, and the protection, acquisition and movement of proprietary interests. The principles of conveyancing practice are clearly explained, ensuring that this is an essential text for apprentices and practitioners in this field.

An explosive new novel from the author of Room 207

After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application examples illustrate the methodologies addressed.

In this introductory textbook, the author contextualises approaches and theories on communication studies by making use of local examples from the mass media, as well as relevant political and social experiences. The book is divided into two parts. The first provides students with a strong foundation in communication while the second focuses on the areas of specialisation within communication studies. Each chapter starts with the learning Outcomes and a short overview of the chapter. Students can monitor their learning by using the summaries and 'test yourself' questions at the end of every chapter. Scenarios provide examples of how the theory can be applied in practice. This makes for a learner-friendly and accessible book which will prove invaluable to Students and professionals alike. Beginner students majoring in Communication Studies, as well as those studying towards various degrees or qualifications where communication is a prerequisite will find this book useful.

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

This third edition, like the first and second, strikes a balance between the theory of the law of evidence and its practical application in a constitutional issues, the impact of these sections on the Anglo-South African law of evidence, and the extent to which some of them may be subject to constitutional challenges. Stock is also taken of the provisions of the Electronic Communications and Transactions Act 25 of 2002 and the consequences of the repeal of s 66 of the Internal Security Act 74 of 1982.

Business Management for Entrepreneurs introduces entrepreneurs and managers of small and medium-sized businesses to all the functions needed to manage these organizations successfully. This is an essential guide to the small business management competencies that are essential for the success of a smaller business.

"Did you know that, in South Africa, 70% to 80% of small businesses fail within the first five years of their establishment? Research indicates that this failure is often due to a lack of understanding of basic business concepts by the entrepreneur. In the competitive South African business environment, it is essential that aspiring entrepreneurs and new business owners have a solid foundation of knowledge on which to build sustainable businesses. Entrepreneurship and how to establish your own business (6th edition) is a foundational book covering the key areas of entrepreneurship and small business development."--Publisher's description.

Addressing the increasing number of culturally and linguistically diverse students in today's schools, this book provides general and special education teachers with the knowledge, skills, and strategies to make the proactive, active, and reactive interventions necessary to create a positive classroom environment in which all students can learn.

Present-day enterprises need insights into markets, customers and their own internal processes faster than their competitors to capitalise on opportunities and to deliver sustainable business performance. To do this, businesses must learn to cope with the high volume and velocity of real-time structured and unstructured data in different formats. In covering the fields of manpower development, accounting procedures and data processing, a middle-of-the-road analysis has been made to include those overlapping developments in business studies. Disciplines like accountancy and electronic data processing frequently have unavoidable use in commerce and industry. A Handbook in Business Management examines organisation and manpower management and reflects on their significant role in the arena of business management. The objective with manpower management

is to distribute personnel to activities where their talents are required and are best utilised. In financial control, the book examines both the technical and managerial approaches. The technical approach is concerned with measurement where an analysis is made as to whether resources are being assigned to the right categories and whether generally accepted accounting principles are being followed. And the managerial approach is to understand and interpret what the financial figures mean. Critically, all managers should take responsibility for financial management and should not assume that this falls within the remit of the accounts team alone. Under data processing concepts, the book takes an overview of the availability, continuity, and security of data in public and private concerns. An efficient data processing system makes it possible to adjust the financial situation of a business before it gets out of hand by adjusting income distribution and combating organisation and manpower inefficiency. This book offers to the professional student and corporate executive a preliminary survey of the fields of manpower development, accountancy and electronic data processing; while the start-up entrepreneur may find in its pages something to stimulate reflection upon those larger issues in business management.

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

Written by Hennie Swanepoel and Frik de Beer(both based in South Africa) this development studies text, first published in 1997, is suitable for all introductory-level courses.

Revised and updated, this second edition discusses first-line supervisors' management principles from a general management perspective. Covering a variety of topics—including fairness, business culture, leadership, and planning—the book acknowledges that all levels of management must be part of a strategic framework, but that responsibilities differ at various levels. Employment relations, as well as some contemporary issues that influence operational managers, are also discussed.

Understanding Psychopathology: South African Perspectives 3e provides a solid introduction to the study of mental disorders that incorporates socio-cultural, psychological and biomedical dimensions. It refers to criteria from both the Diagnostic and Statistical Manual of Mental Disorders (DSM-5) and the International Classifications of Diseases (ICD-10) to describe and define mental disorders. It also looks at the ICD-11, and how this new version has been harmonised with the DSM-5. The third edition of this book, previously published as Abnormal Psychology revised second edition, presents South African debates and data to ensure that it is relevant to the local context. In addition, research from the rest of Africa has been integrated into the book to show how other countries in our region are grappling with topical issues. This book is aimed at second- and third-year students following courses in Psychopathology or Abnormal Psychology as part of a Bachelor of Arts or Bachelor of Social Sciences degree at Universities. It has been written by academics and practitioners from across South Africa.

Strategic Management: Towards sustainable strategies in southern Africa covers the key concepts of strategy and shows how these are integrated within the management environment. The book outlines how South African organisations make use of strategic management principles to make positive and practical changes to their enterprises. It also provides theory and knowledge that can be applied to the work context to enable career growth and development. The book is written for senior undergraduate and postgraduate students of management at universities and universities of technology.

Organized topically rather than historically, this book provides an excellent introduction to the subject of African Philosophy. Samuel Oluoch Imbo synthesizes the ideas of key African philosophers into an accessible narrative. The author focuses on five central questions: What are the definitions of African philosophy? Is ethno-philosophy really philosophy? What are the dangers of an African philosophy that claims to be 'unique'? Can African philosophy be done in foreign languages such as English and French? Are there useful ways to make connections between African philosophy, African American philosophy, and women's studies? By making cross-disciplinary and transnational connec-

tions, Imbo stakes out an important place for African philosophy. Imbo's book is an invaluable introduction to this dynamic and growing area of study.
