back.

Earthquake by Francine Pascal - Goodreads

"Intimate, taut, shimmering, and unflinching, the earthquake room crosses two cities, one bay, and a kind of queer love that feels like it's about to be lost forever. This is the very physical story of a nearby disaster, an urgent reminder that the (almost) end of the world doesn't mean what we feel for one another gets squared up—but rather that wanting to feel at all is how we survive.

An earthquake is a sudden, rapid shaking of the ground caused by the shifting of rocks deep underneath the earth's surface. Earthquakes can cause fires, tsunamis, landslides or avalanches. While they can happen anywhere without warning, areas at higher risk for earthquakes include Alaska, California, Hawaii, Oregon, Puerto Rico, Washington and the entire Mississippi River Valley.

America's first crusading novelist, Cooper reminds us that literature is not a cloistered art; rather, it ought to be intimately engaged with the world. In this second volume of his definitive biography, Wayne Franklin concentrates on the latter half of Cooper's life, detailing a period of personal and political controversy, far-ranging international travel, and prolific literary creation.

The key to writing, in other words, was writing, which was the second lesson, and it was a one that I'd remember when I began my second first book. II. I wrote my second first book over the course of twenty months, from June 18, 1982 to February 26, 1984. This was a novel also, the first I'd attempted since my experiment with spoken prose.

The first section of the book felt somewhat disorienting and fractured, which may have been a purposeful reflection of Janis/Cody/et al Plumtree's multiple personalities. As Plumtree and her new-met friend Cochran meet up with the companions (all familiar from the first two books of the Fault Lines series), the book begins to gain cohesion.

My First Book of Earthquakes and Volcanoes - Collins

This is the first book to document a geologist's uncanny ability to foretell earthquakes around the world. Many of his theories--based on tides, moons, geyser activity, disoriented pets, lost cats and dogs, and magnetic field changes--are linked to the great Indian Ocean quake-tsunami disaster on December 26, 2004.

Earthquake Weather (Fault Lines, #3) by Tim Powers

Historical earthquakes is a list of significant earthquakes known to have occurred prior to the beginning of the 20th century. As the events listed here occurred before routine instrumental recordings, they rely mainly on the analysis of written sources. There is often significant uncertainty in location and magnitude and sometimes date for each earthquake.
