MCQs for Medical Students and Doctors is an unusual multiple-choice question book on three accounts: • It covers thirteen of the specialties in medicine that every medical student has to face and every first-contact physician has to deal with in encounters with their patients irrespective of the doctor's field of specialization; • Unlike many MCQ books, this book goes further by providing comments that accompany >99% of the answers as explanations or additional information. This makes this book an MCQ book with "short notes"; • It

is different from most, if not all, MCQ books in medicine for the others are usually specialty-specific. This MCQ book successfully covers fundamental topics in three selected pre-clinical subjects viz.: anatomy, pharmacology and therapeutics, and parasitology as well as ten clinical specialties viz.: obstetrics and gynecology, dermatology, anesthesia, mental health, ophthalmology, otorhinolaryngology, general surgery, orthopedics/trauma, internal medicine, and general pediatrics.
