This release introduces a prototype of the Oracle Application Express JavaScript API Reference to the Oracle Application Express library of documentation. As an introductory publication, it is likely some JavaScript APIs were excluded in this initial version. In the future, this reference will contain all JavaScript

APIs.

JavaScript APIs - Oracle

Oracle APEX uses a database encapsulated simple metadata-driven architecture that provides fast data access, top performance, and scalability, out of the box. Features Oracle APEX offers all the tools you need to be productive, deliver on time, and produce stunning results for your business.

Oracle Application Express (APEX)

The apex.item API provides a single interface for item related functionality of Application Express. This API returns an Application Express item object, which can then be used to access item related functions and properties. Item objects can apply to either page items or column items.

apex.item - Oracle

Oracle APEX Application Development is a fully managed, low-code application development platform for building and deploying modern data-driven applications in Oracle Cloud. Business users and application developers can create enterprise apps 20X faster with 100X less code—without having to learn complex web technologies.
