This innovative text for Neonatal Nurses and NICU clinicians introduces new, evidence-based care protocols proven to mitigate or reduce the profound morbidities and subsequent developmental challenges that afflict newborns in the NICU. The book reframes the concept of developmentally supportive care to trauma-informed, age-appropriate care of the hospitalized premature infant. Aimed at transforming NICU practice, the book links developmental care to quality standards and Joint Commission requirements. The text is also unique in its provision of engaging online learning activities that facilitate the translation of content into clinical practice, whereby the user can also earn CEUs. The text highlights the ways in which Nightingale's tenets of nursing and Watson's theory of human caring science resonate with the its subject matter and are applied in the NICU. It includes examples of favorable outcomes associated with the protocols described in this book from practitioners in the U.S. and overseas. Additionally, the text aligns with

NANN guidelines for Age Appropriate Care of the Premature and Hospitalized Infant. This book will provide the neonatal nurse/APN with best available, evidence-based caring strategies to consistently and reliably manage the trauma associated with the NICU experience and mitigate both short-term and long-term complications associated with this developmental trauma. Key Features: Introduces cutting-edge, evidence-based care protocols proven to reduce the profound morbidities and developmental challenges of premature infants Reframes the concept of developmentally supportive care to trauma-informed, age-appropriate care Meets Joint Commission requirements for age-appropriate staff education Includes examples from researchers and practitioners worldwide Presents innovative online learning activities to facilitate translation of content to clinical practice Focusing on critical care nursing, this full-color text provides an examination of the important aspects of critical care nursing. It is organized in ten units around alterations in body systems. Cardiac Surgery Essentials for Critical Care Nurs-

ing, Third Edition is an indispensable resource for new and experienced nurses caring for patients in critical care units immediately following cardiac surgery and in the transitioning to home. With an evidence-based foundation, the Third Edition addresses nursing knowledge to meet the needs of acutely ill patients and strategies to optimizing patient outcomes in this dynamic field. Vital information has been added and updated to reflect significant changes in cardiac surgery as well as four new chapters based on needs of patients, families, and readers. These new chapters address nutritional issues, post ICU-care, psychological and spiritual support, and rehabilitation care post cardiac surgery. This money-saving package is a must-have for nursing students! It includes Sole's Introduction to Critical Care Nursing 4th edition text and an electronic version of the textbook that allows students to search, highlight information, take notes, share notes and more. This package makes it simple for students to make the most of their study time and get more use out of their textbooks!

An essential reference for nursing students in developing and implementing the competencies necessary in caring for critically ill patients! Synergy for Clinical Excellence: The AACN Synergy Model for Patient Care enhances the understanding of The Synergy Model in practice. Based on a decade of work by the American Association of Critical-Care Nurses, the text encompasses the history and development of the nurse and patient characteristic inherent in The Synergy Model, and then thoroughly addresses each characteristic individually and applies the model in practice. Includes sample test questions relevant to the model that will assist nursing students in preparing for certification through AACN, and provide further examples of the integration of the Synergy Model in practice.
