John Newman invites teachers to take their students on a playwriting voyage in *Playwriting in Schools*. The book examines how students who learn to write plays and work with a professional playwright in residence empower themselves and gives instructors tools for teaching the process of playwriting in a way that makes space for the student voice. *Playwriting in Schools* investigates two main approaches for adult teachers and playwrights to use playwriting as a strategy for student self-expression. One approach is through the creation of fully-developed plays, written either by individual students with instruction from teachers or through interactions between a team of students and a teacher-playwright. The other approach is developing plays through collaborations among professional playwrights, teachers and student actors, crafting new plays in ways that suit the needs, interests and learning of young people. Throughout, Newman and the teachers and playwrights he features express themselves with an artistic generosity that encourages us to widen the scope of our own programmes by introducing students to the vast ocean of playwriting and play development.

Music videos are a necessity if you want to take your musical career to the next level. But how do you create one without breaking the bank? This book delivers the answers. Written by two acclaimed recording artists who've been producing their own award-winning music videos for several years, it shows you step-by-step how to get from an idea to an MTV-worthy result on a shoestring budget -- even if you've never worked with video before. Packed with easy-to-understand instructions, hands-on exercises and fascinating road diaries that illuminate the inspiration behind video concepts and special effects, it's all you need to become a music video star. If you are a music lover and have always thought that you could make a music video if only you had the right tools, this book is for you. If you or someone you know is in a band, and you want to make a video for your website, a cable TV channel, or as a promotional tool, this book is all you need. If you have great stacks of pre-video vinyl, and you always wanted to make your own video for your favorite song, you've come to the right place. If you saw a video on TV and said, "I could make a much better video than that," here's your

chance. If you want to become a professional music videographer, this book is a great place to start.

Addressing base erosion and profit shifting (BEPS) is a key priority of governments. In 2013, OECD and G20 countries, working together on an equal footing, adopted a 15-point Action Plan to address BEPS. This

publication is the final report for Actions 8-10.

For much of the sixteenth-century, France was wracked with religious strife, as the Wars of Religion pitted Catholic against Protestant. Whilst the conversion of Henri IV to Catholicism ended much of the conflict, the ensuing peace highlighted the fractious nature of French Catholicism and the many competing threads that ran through it. This book investigates the gradual division of the French Catholic reform movement, often associated with those known as the 'devots' during the first half of the seventeenth century. Such division, it is argued, was emerging before the publication in France (1641) of the posthumous 'Augustinus' of Jansenius, not simply as a sequel to that. Those who were already distinguishing themselves from other 'devots' before that date were thus not yet identifiable as 'Jansenists'. Rather, the initial defining sentiment was increasing French hostility towards Jesuit involvement in Catholic Reform, both at home and abroad. Drawing on sources from the Jesuit archives in Rome and on Port-Royal material in Paris, the book begins with an investigation into the development of

Catholic Reform in France, showing the problems that emerged before 1629 and the degree to which these were or were not resolved. The second half of the book contrasts the fragmentation of the movement in the years beyond 1629, and the context of Richelieu's new directions in French foreign policy. Covering a crucial period in the lead up to the establishment of an absolute monarchy in France, this book provides a rich new explanation of the development of French political and ecclesiastical history. It will be of interest not only to those studying the early modern period, but to anyone wishing to understand the roots of French secular society.

Faculty at Indiana University's world-renowned Kelley School of Business present this essential introductory guide to the role of computers and other information technologies in business. Like the text for its sister course, K201, Computers in Business: K204 highlights include instruction and applied practice in two of the most widely used commercial software packages: Microsoft Access and Microsoft Excel. This volume, however, presents even more challenging applications and

projects for honors students. Students learn, via hands-on examples, many of the powerful tools contained in these two platforms, with emphasis on how to analyze real business problems to help make important decisions.

Congregations are made up of people with all sorts of theologies. Pastor Mike Slaughter even says that these can stand in the way of the church's mission of social and personal holiness. But most people do not adopt a theology on purpose, mostly they merely breathe in the prevailing cultural air. The theology "de jour" seems to be Calvinist, with its emphasis on "the elect" and "other worldly salvation." In fact, there is so much Calvinism saturating the culture, that some do not even know there

is an alternative way of thinking about their faith. They don't know where to go to find a viable option; they don't even know the key words to search Google. So people are left thinking like Calvinists but living with a desire to change the world, offering grace and hope to hurting people in mission and ministry—loving the least, the last, and the lost. In other words, they are living like Wesleyans. This book shows what Calvinist and Wesleyans actually believe about human responsibility, salvation, the universality of God's grace, holy living through service, and the benefits of small group accountability--and how that connects to how people can live. Calvinists and Wesleyans are different, and by knowing the difference, people will not only see the other benefits of Wesleyan theology but will be inspired to learn more. By knowing who they are as faithful people of God, they will be motivated to reach out in mission with renewed vigor. And they won't be obstacles to grace and holiness, but they can be better disciples and advocates for Christ through service in this world.

This long-awaited, authoritative account of Bartók's compositional processes stresses the composer's position as one of the mas-

ters of Western music history and avoids a purely theoretical approach or one that emphasizes him as an enthusiast for Hungarian folk music. For Béla Bartók, composition often began with improvisation at the piano. László Somfai maintains that Bartók composed without preconceived musical theories and refused to teach composition precisely for this reason. He was not an analytical composer but a musical creator for whom intuition played a central role. These conclusions are the result of Somfai's three decades of work with Bartók's oeuvre; of careful analysis of some 3,600 pages of sketches, drafts, and autograph manuscripts; and of the study of documents reflecting the development of Bartók's compositions. Included as well are corrections preserved only on recordings of Bartók's performances of his own works. Somfai also provides the first comprehensive catalog of every known work of Bartók, published and unpublished, and of all extant draft, sketch, and preparatory material. His book will be basic to all future scholarly work on Bartók and will assist performers in clarifying the problems of Bartók notation. Moreover, it will be a model for future work on other major com-

posers.
