Frontiers of Pattern Recognition contains the proceedings of the International Conference on Frontiers of Pattern Recognition which took place on January 18-20, 1971, at the University of Hawaii, Honolulu. The compendium consists of 30 papers from authorities from eleven different countries, which describe the frontiers of pattern recognition as viewed from diverse viewpoints. Topics discussed include some techniques for recognizing structures in pictures, grammatical inference, syntactic pattern recognition and stochastic languages, and pattern cognition and the organization of information. Also covered are subjects on human face recognition, cluster analysis, and learning algorithms of pattern recognition in non-stationary conditions. Computer scientists, mathematicians, statisticians, linguists, and psychologists will find the book informative.

This encyclopedia uniquely concentrates on biocolloids and biointerfaces rather than the broader

field of colloid and interface science. Biocolloids and biointerfaces are the youngest but increasingly prominent studied area of colloid and interface science, and this encyclopedia uses "soft particles" and "soft interface" as surface models in observing phenomena in biological systems. Provides a detailed description of the fundamental theories, dealing with the physicochemical and theoretical aspects of biocolloid and biointerface science. Offers a detailed description of soft interfaces or surfaces. Includes detailed description of applications of fundamental biocolloid and biointerface theories to nano-, bio-, and environmental sciences. A useful and timely resource for researchers and graduates in the field of biocolloid and biointerface science, as well as engineers in the field of nanotechnology, bioscience, and environmental science.

Includes 2 quilts, 17 small projects and a 12-block calendar quilt, plus a project from each of the monthly block patterns. There's something for everyone, from quilts and aprons to a backgammon board and a camera bag. "Compilations are one of our favorite types of books because we get to see one thing presented in many different ways by some of the most talented peeps in our industry. And boy, do we love this one! . . . There are bags, a game board, home dec items and even a chair cushion!" —Generation Q Magazine

The fresh and unique iris folding projects featured in this book are perfect for commemorating special occasions with beautiful handcrafted greeting cards. Intended for

crafters at an intermediate skill level, the 20 designs employ both traditional and nontraditional iris folding techniques and make use of materials ranging from fabric, tissue paper, cardstock, ribbon, and specialty papers. Patterns and apertures can be mixed and matched to create unlimited design options, paper can be altered to add texture, and recycled materials can be used to fashion unique finishing touches. The end result will be beautifully made greeting cards to share with cherished friends and family.

“To every crafts question, there is at least one answer, which is how crafter Sorensen approaches novices’ queries....Most of the 35 projects are fairly simple...such as a funky tea set coordinating different types of white ware through colorful stripes, dots, and circles. In contrast, the five artisans featured at the end reveal very upscale handicrafts, ready for purchase in any urban gift shop.”—Booklist.

Kids will flip over these enchanting, unique and party-pleasing cakes that any home baker can make from scratch.
