"The book under review, the second edition of Emmanuele DiBenedetto's 1995 Partial Differential Equations, now appearing in Birkhäuser's 'Cornerstones' series, is an example of excellent timing. This is a well-written, self-contained, elementary introduction to linear, partial differential equations.

Solutions to exercises from Chapter 2 of Lawrence C. Evans' book 'Partial Differential Equations'. Sumeyy e Yilmaz Bergische Universität at Wuppertal Wuppertal, Germany, 42119 February 21, 2016.

1. Write down an explicit formula for a function solving the initial value problem  $u_t + bDu + cu = 0$  in  $\mathbb{R}^n(0;1)$   $u = g$  on  $\mathbb{R}^n t = 0$  Solution: We use the method of characteristics; consider a solution to the PDE along the direction of the vector  $(b;1)$ :  $z(s) = u(x+bs;t+s)$ .

In mathematics, a partial differential equation (PDE) is an equation which imposes relations between the various partial derivatives of a multivariable function.. The function is often thought of as an "unknown" to be solved for, similarly to how  $x$  is thought of as an unknown number, to be solved for, in an algebraic equation like  $x^2 - 3x + 2 = 0$ . ...
