Why do plants store some of the sugar they make as starch? (Marks available: 2) Answer Answer outline and marking scheme for question: 1 Plants could use starch or glucose. Starch is insoluble, while glucose is soluble. This means that if starch is used, less water is required to keep its food stored.

[Exam-style Questions | S-cool, the revision website](#)

Photosynthesis and respiration are two of the key topics within the GCSE Biology and combined Science specifications. From the photosynthesis equation, both word and symbol, to aerobic respiration and enzymes, this topic is tricky and contains a wealth of information you have to learn. You will look at respiration in the context of exercise and how the human body responds to different intensities of exercise and how this impacts on the use of glucose.
