What types of reactions do they undergo? What are the underlying physical and chemical mechanisms involved in their reactivity. Knowledge of specific facts of chemistry is essential for an understanding of principles and concepts. These descriptive facts are taught to illustrate and illuminate fundamental chemistry principles.

Principles Of Descriptive Inorganic Chemistry

I think it is a wonderful book of descriptive inorganic chemistry. Instead of describing various reactions and phenomena, this book tries its best to tell you the principles governing the chemistry of each element in a rather "inorganic" way. I doubt that the beginners will feel it dull as there are no color and only fewer figures in it.
