In today's classrooms, the instructional needs and developmental levels of our students are highly varied, and the conventional math whole-group model has its downsides. In contrast to the rigid, one-size-fits-all approach of conventional whole-group instruction, guided math allows us to structure our math block to support student learning in risk-free, small-group instruction. Guided math goes beyond just reorganizing your math block; it also gives you an opportunity to approach math instruction with a renewed sense of perspective and purpose. Drawing on two decades of experience, Reagan Tunstall offers step-by-step best practices to help educators revolutionize their math blocks with a student-centered approach. Whether you're a new teacher who's curious about guided math or a veteran educator looking to hone your methodology, Guided Math AMPED will transform your math block into an exciting and engaging encounter that encourages your students to see themselves as genuine mathematicians. "Most educators have come to realize that the magic happens at the teacher table or during small-group instruction. If that's the case, Guided Math AMPED is the spell book." -JENNIFER SALYARDS, M.Ed., principal, Chamberlin Elementary, Stephenville ISD "Guided Math AMPED provides educators with a practical framework for enhancing math instruction in a way that provides research-based practices, differentiated instruction, and fun, all while strengthening relationships with students and developing math mindsets. No matter your experience or tenure in education, Guided Math AMPED will give you tips and tricks to implement in your classroom." -MATT BERES, district administrator, Wooster, OH "Guided math is one of the best things you can implement in your classroom, and Reagan Tunstall is the best to learn from, thanks to her perfect framework and step-by-step instructions. She has thought through every potential roadblock and offers concise solutions because she's experienced it all in her own classroom." -HALEE SIKORSKI, educator, A Latte Learning "Don't you dare

let another teacher borrow this book . . . you may never get it back! From the first page to the end, this book is filled with practical ideas and guidelines guaranteed to take your guided math block to the next level." -LORI MCDONALD, M.Ed., retired educator

In September, Mama Earth sighs out the first autumn frost, which crunches under children's feet. Mama Earth looks after nature's plants and animals throughout the year—singing lullabies to fat bears in the fall, dressing evergreens in icicles in winter, and waking up the crocuses in spring. And in the summer, Mama Earth sends warm sunbeams to her beloved children, so they can play outside and enjoy the amazing world around them. With enchanting text and radiant artwork, *A Year with Mama Earth* offers a joyous celebration of nature's beauty and the changing seasons.

In the book of Philippians we are told to be anxious over nothing, and yet we are anxious over everything. We worry that our students will be "behind," that they won't score well on the SAT, get into a

good college, or read enough of the Great Books. Our souls are restless, anxiously wondering if something else out there might be just a little bit better -- if maybe there is another way or another curriculum that might prove to be superior to what we are doing now. God doesn't call us to this work and then turn away to tend to other, more important matters. He promises to stay with us. He assures us that if we rely on Him alone, then He will provide all that we need. What that means on a practical level is that we have to stop fretting over every little detail. We need to stop comparing. We've got to drop the self-inflated view that we are the be-all-end-all of whether the education we are offering our students is going to be as successful as we hope it is. After all, our job is not to be successful -- success itself is entirely beside the point. It's faithfulness that He wants.

"We cannot change the cards we are dealt, just how we play the hand."---Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while

they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Expanding on the philosophy and methods of *The Laws Guide to Nature Drawing and Journaling*, John Muir Laws and Emilie Lygren have developed the first-ever comprehensive book devoted to helping educators use nature journaling as an inspiring teaching tool to engage young people with wild places. In their workshops Laws and Lygren are often asked the how-tos of teaching nature journaling: how to manage student groups in the outdoors, teach drawing skills (especially from those who profess to have none), connect journaling to educational standards, and incorporate journaling into longer lessons. This book puts together curriculum plans, advice, and in-the-field experience so that educators of all stripes can leap into journaling with their students. The approaches are designed to work in a range of ecosystems and settings, and are suitable for classroom teachers, outdoor educators, camp counselors, and homeschooling parents. Full-color illustrations and sample journal pages from notable naturalists show how to put each lesson into practice. Field-tested by over a hundred educators, this book includes dozens of activities that easily support the Common Core and the Next Generation Science Standards--and, just as important, it will show kids and mentors alike how to recognize the wonder and intrigue in their midst.

Classic Books Library presents this brand new edition of "The Federalist Papers", a

collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

From the day it was released in 2000, Keeping a Nature Journal has struck a profound chord among professional, casual, and occasional naturalists of all ages. In response to this groundswell of enthusiasm, we have revised KEEPING A NATURE JOURNAL, updated the interior design, and created a new cover. Undoubtedly the most exciting new element in this second edition is a portfolio of 32 illustrated pages from Clare Walker Leslie's most recent journals, reproduced in full color. What makes KEEPING A NATURE JOURNAL so popular? It is inspiring and easy to use. Clare and

co-author Charles Chuck E. Roth offer simple techniques to give first-time journal-keepers the confidence to go outside, observe the natural world, and sketch and write about what they see. At the same time, they motivate long-time journal-keepers to hone their powers of observation as they immerse themselves in the mysteries of the natural world. Clare and Chuck stress that the journal is a personal record of daily experience and the world around us. Nature's beauty can be observed everywhere, whether in the city, suburbs, or country.
