Processing, the handbook and tutorial, is an indispensable companion to Processing, the integrated programming language and environment that has developed from phenomenon to revolution. Bridging the gap between programming and visual arts, the Processing handbook, in a concise way, connects software elements to principles of visual form, motion, and interaction.

Processing is a flexible software sketchbook and a language for

learning how to code within the context of the visual arts. Since 2001, Processing has promoted software literacy within the visual arts and visual literacy within technology. There are tens of thousands of students, artists, designers, researchers, and hobbyists who use Processing for learning and prototyping.

This book introduces this new literacy by teaching computer programming within the context of the visual arts. It offers a comprehensive reference and text for Processing (www.processing.org), an open-source programming language that can be used by students, artists, designers, architects, researchers, and anyone who wants to program images, animation, and interactivity.
