Water is arguably the most critical and least understood of the foundation elements in brewing beer. Water: A Comprehensive Guide for Brewers, third in Brewers Publications’ Brewing Elements series, takes the mystery out of water’s role in the brewing process. The book leads brewers through the chemistry and treatment of brewing water, from an overview of water sources, to adjusting water for different beer styles, and different brewery processes, to wastewater treatment. The discussions include how to read water reports, understanding flavor contributions, residual alkalinity, malt acidity, and mash pH.

A complete guide to using the best ingredients and minimal equipment to create fun and flavorful brews Ancient societies brewed flavorful and healing meads, ales, and wines for millennia using only intuition, storytelling, and knowledge passed down through generations—no fancy, expensive equipment or degrees in chemistry needed. In Make Mead Like a Viking, homesteader, fermentation enthusiast, and self-described “Appalachian Yeti Viking” Jereme Zimmerman summons the bryggjemann of the ancient Norse to demonstrate how homebrewing mead—arguably the world’s oldest fermented alcoholic beverage—can be not only uncomplicated but fun. Armed with wild-yeast-bearing totem sticks, readers will learn techniques for brewing sweet, semi-sweet, and dry meads, melomels (fruit meads), methglins (spiced meads), Ethiopian t’ej, flower and herbal meads, braggots, honey beers, country wines, and even Viking grog, opening the Mead Hall doors to further experimentation in fermentation and flavor. In addition, aspiring Vikings will explore: • The importance of local and unpasteurized honey for both flavor and health benefits; • Why modern homebrewing practices, materials, and chemicals work but aren’t necessary; • How to grow and harvest herbs and collect wild botanicals for use in healing, nutritious, and magical meads, beers, and wines; • Hops’ recent monopoly as a primary brewing ingredient and how to use botanicals other than hops for flavoring and preserving mead, ancient ales, and gruits; • The rituals, mysticism, and communion with nature that were integral components of ancient brewing and can be for modern homebrewers, as well; • Recommendations for starting a mead circle to share your wild meads with other brewers as part of the growing mead-movement subculture; and more! Whether you’ve been intimidated by modern homebrewing’s cost or seeming complexity in the past—and its focus on the use of unnatural chemicals—or are boldly looking to expand your current brewing and fermentation practices, Zimmerman’s welcoming style and spirit will usher you into exciting new territory. Grounded in history and mythology, but—like Odin’s ever-seeking eye—focusing continually on the future of self-sufficient food culture, Make Mead Like a Viking is a practical and entertaining guide for the ages.

One of Smithsonian Magazine’s Ten Best Books of the Year about Food A Forbes Best Booze Book of the Year Interweaving archaeology and science, Patrick E. McGovern tells the enthralling story of the world’s oldest alcoholic beverages and the cultures that created them. Humans invented heady concoctions, experimenting with fruits, honey, cereals, tree resins, botanicals, and more. These “liquid time capsules” carried social, medicinal, and re-

ligious significance with far-reaching consequences for our species. McGovern describes nine extreme fermented beverages of our ancestors, including the Midas Touch from Turkey and the 9000-year-old Chateau Jiahu from Neolithic China, the earliest chemically identified alcoholic drink yet discovered. From a 1-minute mustard sauce for her last-minute gravlax to a "Peking" pork shoulder that slow-roasts under a savory blanket of hoisin and scallions, these dishes are truly stunning in their ease of preparation, yet never sacrifice on flavor or presentation. The instant New York Times bestseller | A Washington Post Notable Book | One of NPR's Best Books of the Year "Expert storytelling . . . [Pollan] masterfully elevates a series of big questions about drugs, plants and humans that are likely to leave readers thinking in new ways." —New York Times Book Review From #1 New York Times bestselling author Michael Pollan, a radical challenge to how we think about drugs, and an exploration into the pow-

erful human attraction to psychoactive plants—and the equally powerful taboos. Of all the things humans rely on plants for—sustenance, beauty, medicine, fragrance, flavor, fiber—surely the most curious is our use of them to change consciousness: to stimulate or calm, fiddle with or completely alter, the qualities of our mental experience. Take coffee and tea: People around the world rely on caffeine to sharpen their minds. But we do not usually think of caffeine as a drug, or our daily use as an addiction, because it is legal and socially acceptable. So, then, what is a "drug"? And why, for example, is making tea from the leaves of a tea plant acceptable, but making tea from a seed head of an opium poppy a federal crime? In *This Is Your Mind on Plants*, Michael Pollan dives deep into three plant drugs—opium, caffeine, and mescaline—and throws the fundamental strangeness, and arbitrariness, of our thinking about them into sharp relief. Exploring and participating in the cultures that have grown up around these drugs while consuming (or, in the case of caffeine, trying not to consume) them, Pollan reckons with the powerful human attraction to psychoactive plants. Why do we go to such great lengths to seek these shifts in consciousness, and then why do we fence that universal desire with laws and customs and fraught feelings? In this unique blend of history, science, and memoir, as well as participatory journalism, Pollan examines and experiences these plants from several very different angles and contexts, and shines a fresh light on a subject that is all too often treated reductively—as a drug, whether licit or illicit. But that is one of the least interesting things you can say about these plants, Pollan shows, for when we take them into our bodies and let them change our minds, we are engaging with nature in one of the most profound ways we can. Based in part on an essay published almost twenty-five years ago, this groundbreaking and singular consideration of psychoactive plants, and our attraction to them through time, holds up a mirror to our fundamental human needs and aspirations, the operations of our minds, and our entanglement with the natural world.

Goose Island opened as a family-owned Chicago brewpub in the late 1980s, and it soon became one of the most inventive breweries in the world. In the golden age of light, bland and cheap beers, John Hall and his son Greg brought European flavors to America. With distribution in two dozen states, two brewpubs and status as one of the 20 biggest breweries in the United States, Goose Island became an American success story and was a champion of craft beer. Then, on March 28, 2011, the Halls sold the brewery to Anheuser-Busch InBev, maker of Budweiser, the least craft-like beer imaginable. The sale forced the industry to reckon with craft beer's mainstream appeal and a popularity few envisioned. Josh Noel broke the news of the sale in the Chicago Tribune, and he covered the resulting backlash from Chicagoans and beer fanatics across the country as the discussion escalated into an intellectual craft beer war. Anheuser-Busch has since bought nine other craft breweries, and from among the outcry rises a question that Noel addresses through personal anecdotes from industry leaders: how should a brewery grow?

Experimentation, mystery, resourcefulness, and above all, fun—these are the hallmarks of brewing beer like a Yeti. Since the craft beer and homebrewing boom of the late twentieth and early twenty-first centuries, beer lovers have enjoyed drinking and brewing a vast array of beer styles. However, most are brewed to accentuate a single ingredient—hops—and few contain the myriad herbs and spices that were standard in beer and gruit

recipes from medieval times back to ancient people's discovery that grain could be malted and fermented into beer. Like his first book, *Make Mead Like a Viking*, Jereme Zimmerman's *Brew Beer Like a Yeti* returns to ancient practices and ingredients and brings storytelling, mysticism, and folklore back to the brewing process, including a broad range of ales, gruits, bragots, and other styles that have undeservingly taken a backseat to the IPA. Recipes inspired by traditions around the globe include sahti, gotlandsdricka, oak bark and mushroom ale, wassail, pawpaw wheat, chicha de muko, and even Neolithic "stone" beers. More importantly, under the guidance of "the world's only peace-loving, green-living Appalachian Yeti Viking," readers will learn about the many ways to go beyond the pale ale, utilizing alternatives to standard grains, hops, and commercial yeasts to defy the strictures of style and design their own brews.

For Heineken, "rising Africa" is already a reality: the profits it extracts there are almost 50 per cent above the global average, and beer costs more in some African countries than it does in Europe. Heineken claims its presence boosts economic development on the continent. But is this true? Investigative journalist Olivier van Beemen has spent years seeking the answer, and his conclusion is damning: Heineken has hardly benefited Africa at all. On the contrary, there are some shocking skeletons in its African closet: tax avoidance, sexual abuse, links to genocide and other human rights violations, high-level corruption, crushing competition from indigenous brewers, and collaboration with dictators and pitiless anti-government rebels. Heineken in Africa caused a political and media furor on publication in The Netherlands, and was debated in their Parliament. It is an unmissable exposé of the havoc wreaked by a global giant seeking profit in the developing world.
