A guide to Latin American history includes a chronology of key events from pre-Columbian history through the present, a thematic survey following each topic (economic change, cultural development, politics and government) across time, and 300 biographies of Latin Americans throughout history.

Aircraft Communications Addressing and Reporting System (ACARS) is a digital datalink system for transmission of short, and relatively simple messages between aircraft and ground stations using the

airband VHF radio link. The message protocol was designed by Aeronautical Radio Incorporated (ARINC) to replace their VHF voice service and deployed in 1978 using telex type format. SITA, a multinational information technology company, later augmented their worldwide data network by adding ground radio stations to provide ACARS service.

Adulting is hard! But “kidulting”—engaging in nostalgic childhood activities to relieve stress, like playing with your old favorite toys, participating in games and activities from your youth, and even snacking on the foods you enjoyed as a kid— isn’t. Let this book be your guide to indulging your inner child. “Kidulting” is a thing, and it’s growing! Especially popular among millennials, the term “kidulting” refers to engaging in activities from your childhood, sometimes with a grown-up twist. Psychology Today points out that playing like a kid helps you look at the world with fresh eyes—or “beginner’s mind”—which allows you to slow down and focus. The Kidult Handbook is a fun and informative guide to healthy escapism through play. Much like adult coloring books, kidulting is a way of focusing your mind on something fun and creative to relieve stress. But this book goes way beyond just coloring—it includes 160 ideas for fun, from timeless classics like building blanket and pillow forts, to generation-specific ideas, from millennials to boomers. Interspersed throughout are fun facts and trivia about games through the ages. Most activities are unplugged and screen-free, and range from solitary pursuits to ones you can share with a friend or two. Feeling young again has never been so easy!

"While we all use remote controls, we understand little about their history or their impact on our daily lives. By emphasizing volume control, channel shifting, and multi-function management, they tell a story about our experience of mass media, culture, and domestic life. Remote controls reveal the deep impact electronics design has on our self-perception and world-view. This book offers lively analyses of the remote control's material, literary, and cultural history to explain how such an innocuous media accessory can change the way we occupy our houses, interact with our families, and experience the world. From the first wired radio remotes of the 1920s to infrared universal remotes, from the homemade TV controllers to the Apple Remote, remote controls shape our media devices and how we live with them"--

The Recorded Consultation Assessment (RCA) represents a significant change for a generation of doctors used to taking practical exams featuring actors. The RCA exam is based on recordings of your telephone and video consultations with genuine patients, but of course patients don't present or respond quite like actors do! This full-colour book provides a practical guide to help nervous candidates, and particularly International Medical Graduates (IMGs), prepare effectively, with useful advice on: Common pitfalls Working with your practice team to identify the patients you need Obtaining consent Differentiating between low and high challenge cases, and which topics to avoid Setting up the technology for telephone, video and face-to-face consultations How to perform well in each of the core domains In addition, the book takes you through all aspects of using the FourteenFish platform to record, assess and submit your consultations, with screenshots used to illustrate every step. If you need help to prepare from someone who passed the exam as part of the first cohort, who has run RCA exam preparation courses, and who has checked what is required with trainers and programme directors, then you need this book! Really packed with practical and clinical tips Covers everything you need to know before submitting A stress-free way to prepare for the exam

An Interregional Expert Meeting on the Use of Satellite Imaging RADAR and Thematic Mapping in Natural Resources Development, organized by the Economic and Social Development Center of the German Foundation for International Development - DSE - in co-operation with the United Nations Department of Technical Co-operation for Development - DTCD - was held in Berlin (West) from 21 November to 4 December 1984. As a result of this meeting, the participants made the following recommendations: A. REMOTE SENSING SYSTEMS AND AVAILABILITY OF DATA 1. Acquisition Platforms and their Continuity The participants expressed concern over the insecurity which clouds the future of orbital remote sensing platforms - the U. S. Landsat series should be continued, if at all possible. The planned initial ten-year operational lifetime of SPOT is encouraging and received support. ESA/ERS 1, Japan J-ERS 1 and Canada's RADARSAT programmes should be given full implementation commitment, as soon as possible, and plans should be developed for system continuity. The participants noted that development of national and regional remote sensing programmes in developing nations, and establishment and upgrading of appropriate ground receiving stations for these systems depends critically on the prospect of platform continuity. vii SATELLITE REMOTE SENSING FOR RESOURCES DEVELOPMENT 2. Future Developments (a) Future developments in microwave remote sensing from space should be encouraged so as to circumvent, among others, the problem of cloud cover and to facilitate extension of application areas.
