Nurse Manager Engagement: Strategies for Excellence and Commitment is based on the groundbreaking and highly regarded national "Nurse Engagement Study" project funded by The Robert Wood Johnson Foundation. The book builds upon the key ideas in the study by including examples from Dr. Mackoff's conversations and key teaching points from her work with several hundred nurse managers in the three years following this innovative study. Nurse Manager Engagement offers a groundbreaking approach—one that distinguishes it from other nurse management books by a focus on building a model of the solution rather than a description of the problem. It focuses on the crucial role of the nurse manager in engaging staff nurses and building a pipeline for future nurse leadership.

When a term is overused, it tends to fall out of fashion. Cynicism seems to be an exception. Its polytropic versatility apparently prevents any discontinuation of its application. Everyone knows that cynicism denotes that which is deemed deleterious at a given time; and every time will specify its toxicities – the apparent result being the term's non-specificity.

This study describes the cynical stance and statement so as to render the term's use scholarly expedient. Close readings of textual sources commonly deemed cynical provide a legible starting point. A rhetorical analysis of aphorisms ascribed to the arch-Cynic Diogenes facilitates describing the design of cynical statements, as well as the characteristic features of the cynical stance. These patterns are identifiable in later texts generally labeled cynical – above all in Machiavelli's *Principe*. With recourse to the Diogenical archetype, cynicism is likewise rendered describable in Gracián's *Oráculo manual*, Diderot's *Le neveu de Rameau*, and Nietzsche's *Posthumous Fragments*. This study's description of cynicism provides a phenomenon otherwise considered amorphous with distinct contours, renders transparent its workings, and tenders a dependable basis for further analyses.

The result of Creative Health Care Management's 25 years experience in health care, this book provides health care leaders with basic concepts for transforming their care delivery system into one that is patient and family centered and built on the power of relationships. Relationship-Based Care provides a practical framework for addressing current challenges and is intended to benefit health care organizations in which commitment to care and service to patients is strong and focused. It will also prove useful in organizations searching for solutions to complex struggles with patient, staff and physician dissatisfaction; difficulty recruiting and retaining and developing talented staff members; conflicted work relationships and related quality issues. Now in its 16th printing, Relationship-Based Care has sold over 65,000 copies world-wide. It is the winner of the American Journal of Nursing Book of the Year Award.

This book presents 91 papers reflecting the experience of a large family of workers in the field of parallel and distributed computing systems. It explores fresh results and important methods and tools. Among topics addressed are: architectures and algorithms, parallel computing in non-numerical processes, parallel computing in optimization, control and signal/image processing, distributed computing and control, neural computing, communication networks, and engineering applications. Research institutes and companies, as well as universities and individual computer, control, systems, or communications scientists and engineers should find this a valuable addition to their libraries.

The first of its kind, this modern, comprehensive text covers both analysis and design of piping systems. The authors begin with a review of basic hydraulic principles, with emphasis on their use in pumped pipelines, manifolds, and the analysis and design of large pipe networks. After the reader obtains an understanding of how these principles are implemented in computer solutions for steady state problems, the focus then turns to unsteady hydraulics. These are covered at three levels:

A much-praised memoir of living and surviving mental illness as well as "a stereotype-shattering look at a tenacious woman whose brain is her best friend and her worst enemy" (Time). Elyn R. Saks is an esteemed professor, lawyer, and psychiatrist and is the Orrin B. Evans Professor of Law, Psychology, Psychiatry, and the Behavioral Sciences at the University of Southern California Law School, yet she has suffered from schizophrenia for most of her life, and still has ongoing major episodes of the illness. *The Center Cannot Hold* is the eloquent, moving story of Elyn's life, from the first time that she

heard voices speaking to her as a young teenager, to attempted suicides in college, through learning to live on her own as an adult in an often terrifying world. Saks discusses frankly the paranoia, the inability to tell imaginary fears from real ones, the voices in her head telling her to kill herself (and to harm others), as well as the incredibly difficult obstacles she overcame to become a highly respected professional. This beautifully written memoir is destined to become a classic in its genre.

A weekly review of politics, literature, theology, and art.

The 140 articles in the 4-volume set represent the efforts of AHRQ-funded patient safety researchers as well as the patient safety initiatives of other parts of the Federal Government. The articles cover a wide range of research paradigms, clinical settings, and patient populations, and they cover various stages of the research process. The volumes include the articles research that is complete and from research still in process, as well as a series of articles that address implementation issues and provide useful tools and products that can be used to improve patient safety.
