Discipline and Learn: Bodies, Pedagogy and Writing explores how discipline is typically construed as a form of subjection in contemporary educational thought and in critical and cultural theory more broadly. It provides a critique of this emphasis on the repressive aspects of discipline highlighting its enabling potential and role in the development of dispositions to learning. The book engages with the work of a range of theorists: Foucault, Bourdieu, Merleau-Ponty, Mauss and Spinoza and considers their usefulness in theorizing embodiment and learning in the teaching of writing in the early years of school. Emphasis, however, is placed on the work of Bourdieu and his notion of habitus melding theory and practice in an ethnography of contemporary classrooms. This text is invaluable reading for students and academics across the social sciences and humanities interested in questions of embodiment, affect and their relation to learning. This is the most thought-provok-

ing book to be published on pedagogy in a long, long time. Conceptually elegant and empirically rich, it undercuts conventional wisdom and potentially rearranges how we think about teaching, learning and writing. It argues that students' bodies not just their minds matter in learning, explaining how, in practice, the desire to learn is a mindful bodily disposition. And it shows how, through an enabling form of discipline, teachers can produce a scholarly habitus in all students, including the educationally disadvantaged and defiant. Jane Kenway, Professor of Education, Monash University Discipline and Learn: Bodies, Pedagogy and Writing an excellent book which makes an important contribution to our understanding of both pedagogy and the body and which is sure to spark debate in both fields. It is careful and judicious in its approach but still manages to be provocative and original. Nick Crossley, Professor of Sociology, University of Manchester

Teaching Academic ESL Writing: Practical Techniques in Vocabulary and Grammar fills an important gap in teacher professional preparation by focusing on the grammatical and lexical features that are essential for all ESL writing teachers and student-writers to know. The fundamental assumption is that before students of English for academic purposes can begin to successfully produce academic writing, they must have the foundations of language in place--the language tools (grammar and vocabulary) they need to build a text. This text offers a compendium of techniques for teaching writing, grammar, and lexis to second-language learners that will help teachers effectively target specific problem areas of students' writing. Based on the findings of current research, including a large-scale study of close to 1,500 non-native speakers' essays, this book works with several sets of simple rules that collectively can make a noticeable and important difference in the quality of ESL students' writing. The teaching strategies and techniques are based on a highly practical principle for efficiently and successfully maximizing learners' language gains. Part I provides the background for the text and a sample of course curriculum guidelines to meet the learning needs of second-language teachers of writing and second-language writers. Parts II and III include the key elements of classroom teaching: what to teach and why, possible ways to teach the material in the classroom, common errors found in student prose and ways to teach students to avoid them, teaching activities and suggestions, and questions for discussion in a teacher-training course. Appendices to chapters provide supplementary word and phrase lists, collocations, sentence chunks, and diagrams that teachers can use as needed. The book is designed as a text for courses that prepare teachers to work with post-secondary EAP students and as a professional resource for teachers of students in EAP courses.

While there is much in the literature on ESL development, this book is the first of its kind to track the development of specific language abilities in an Intensive English Program (IEP) longitudinally and highlights the implications of this particular study's findings for future IEP implementation and practice and ESL and SLA research. The volume draws on many years' worth of data from learners at an IEP at the University of Pittsburgh to explore selected aspects of language development, including lexical, grammatical, speaking, and writing abilities, in addition to placement assessment practices and student learning outcomes. A concluding chapter points to the ways in which these findings can be applied to decision making around IEP curriculum development and the future role of IEPs in higher education more broadly. With its focus on students in IEP settings and the concentration on data from students evaluated over multiple semesters, this volume offers a unique opportunity in which to examine longitudinal developmental patterns of different L1 groups on a variety of measures from the same learners and will be key reading for students and researchers in second language acquisition, English for Academic Purposes, language education, and applied linguistics.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set

qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
