If you love music and have played an instrument for any length of time, chances are that you've thought about playing in a band. Life in a band can be a great adventure, but it's not always obvious how to get from playing by yourself to rocking out with a group. Luckily, we're here to help. Being in a band isn't all show time and success—there's a lot of hard work involved before you're ever ready to step on a stage, but we'll give you step-by-step advice on everything from forming a band and practicing to songwriting and gear maintenance. Every band's journey is unique, but there are fundamental things you can do to help move toward your dream. Each chapter draws on the author's experience from seven years of band life with six completely different groups, so you get the knowledge of professional musicians without the same bumps and bruises they got along the way. About the Expert Matt Brunson is a vocalist, songwriter, and multi-instrumentalist specializing in guitar and bass. He has been playing music professionally for seven years and has been part of six different bands, ranging in style from indie folk to pop punk and alternative rock. He is a firm believer that good music comes from originality and staying true to yourself, not from having the most expensive gear or being signed to a major label. When he isn't songwriting or practicing for a gig, you can find him poring over the latest gear reviews, daydreaming of that perfect new guitar, gaming, or playing with his cats. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.

Appendices include: a chronology of gaming software and hardware, a list of game designers showing their main titles, results of annual video game awards, notes on sourcing video games, and a glossary of gaming terms.

The overriding aim of this groundbreaking volume—whether the subject is vocal ornamentation in 19th-century opera or the collective improvisation of the Grateful Dead—is to give new recognition to performance as the core of musical culture. The collection brings together renowned scholars from performance studies and musicology (including Philip Auslander, David Borgo, Daphne Brooks, Nicholas Cook, Maria Delgado, Susan Fast, Dana Gooley, Philip Gossett, Jason King, Elisabeth Le Guin, Aida Mbowa, Ingrid Monson, Roger Moseley, Richard Pettengill, Joseph Roach, and Margaret Savilonis), with the intent of sparking a productive new dialogue on music as performance. Taking It to the Bridge is on the one hand a series of in-depth studies of a broad range of performance artists and genres, and on the other a contribution to ongoing methodological developments within the study of music, with the goal of bridging the approaches of musicology and performance studies, to enable a close, interpretive listening that combines the best of each. At the same time, by juxtaposing musical genres that range from pop and soul to the classics, and from world music to games and web-mediated performances, Taking It to the Bridge provides an inventory of contrasted approaches to the study of performance and contributes to its developing centrality within music studies.

As technology advances, society retains its mythical roots—a tendency evident in rock music and its enduring relationship with myth and science fiction. This study explores the mythical and fantastic themes of artists from the late 1960s to the mid-1980s, including David Bowie, Pink Floyd, Jefferson Airplane, Blue Oyster Cult, Iron Maiden, Led Zeppelin and Black Sabbath. Drawing on insights from Joseph Campbell, J.G. Frazer, Carl Jung and Mircea Eliade, the author examines how performers have incorporated mythic archetypes and science fiction imagery into songs that illustrate societal concerns and futuristic fantasies.

During the Neogene - covering the last 23 Million years - the evolution of the environmental setting in Africa was subject to considerable changes. Natural shifts, slow and rapid, evidenced by modifications in palaeogeography, geodynamics, climate, and vegetation have caused repeated and strong changes of ecosystems in the lower latitudes. Using a variety of proxy data - researched and applied by many authors from numerous disciplines - an attempt is made to reconstruct African landscapes over space and

time. Besides such spatio-temporal oscillations in recently humid, semi-humid, and dry areas of Africa, this volume of Palaeoecology of Africa (PoA) focuses on long term interrelationships between ecosystem dynamics and climate change, not ignoring the ever growing and ongoing influence of humans on natural ecosystems since the Quaternary. Regionally, this volume lays a strong focus on Nigeria (Niger Delta). Facing the omnipresent challenges of Global Change, an increasing number of African scientists is involved in palaeoenvironmental and palaeoclimatic research, both theoretical and applied. PoA systematically supports established as well as junior African scientists in the field of sustainable cooperation and academic capacity building. This book will be of interest to all concerned with or interested in up-to-date research on Neogene to Quaternary low latitudes ecosystem changes and their respective interpretation in the framework of natural climate and vegetation change evidenced by a variety of methods that allow to read and learn from the past by following the motto, "The geologic foretime as the key to the present, and possibly to the future." Palynologists, Geologists, Geographers, Archaeologists, and Geomorphologists will find this edition equally useful for their work.
