How to document a Software Development Project. ... So keep in mind that documentation, like software development, is a process where teams learn and adapt their collaboration routines. This will lead to constant improvements of the documentation or the process of how people want to work together.

Software teams may refer to documentation when talking about product requirements, release notes, or design specs. They may use docs to detail code, APIs, and record their software development processes. Externally, documentation often takes the form of manuals and user guides for sys-admins, support teams, and other users.

Believe it or not, an agile approach to documentation can address all these problems—but only if the whole agile team is on board. Here's why everyone should care about documentation and how to do documentation right. [ Get up to speed on quality-driven development with TechBeacon's new guide.
