### **Seafish Report No. SR567**

This is another version of the standard three warp twin rig set up. Although the main concept of multi rig systems is to enable the vessel to cover a wider area of seabed with no increase in drag, this method evolved to be able to efficiently target both bottom living species and some of the round fish living slightly higher in the water column.

### **Twin Rig Trawl Mixed Species Twin Rig - Seafish**

Out rig trawling is a method of multi rig trawling where two small otter trawls with the nets close behind them, are towed from the ends of outrigger derricks in a similar way to how a beam trawler tows its gear.

### **Out Rig Trawling - Seafish**

Seafish staff are demonstrating the benefits of the T90 technology to UK skippers as a viable option. The T90 technology has already been successfully developed for whole trawl application by the Icelandic trawl manufacturer Fjardanet, as well as a 40' trawler in New Zealand.
