The latest edition of this best-selling textbook by Miles and Huberman not only is considerably expanded in content, but is now available in paperback. Bringing the art of qualitative analysis up-to-date, this edition adds hundreds of new techniques, ideas and references developed in the past decade. The increase in the use of computers in qualitative analysis is also reflected in this volume. There is an extensive appendix on criteria to choose from among the currently available analysis packages. Through examples from a host of social science and professional disciplines, Qualitative Data Analysis remains the most comprehensive and complete treatment of this topic currently available to scholars and applied researchers.

Female leadership has been a topic of debate for centuries between theologians and laity, Christians and non-Christians, as well as men and women. This study will present a theological analysis of the debate concerning male and female roles in leadership positions and ministry. An analysis of the role of the female pastor's spouse, the effects of sexism in religion, and how it has influenced the ecclesiology of the church will be examined as well. Reflections of case studies employing biblical narratives of couples in the Bible will be used to substantiate the roles of women leaders and their spouses. Each scenario identifies the particular role of the husband and the wife, specifically when the wife is the spiritual leader. Read with anticipation the outcome of biblical interpretation of the roles of the female leader and their spouses.

The book contains 256 questions and answers for job interview for hiring on onshore drilling rigs. In *Unstable and Brittle Diabetes*, Geoff Gill brings together research on the management of brittle diabetes (or erratic glucose control), which is a controversial area in terms of definition and management and one that creates much debate among diabetologists. This monograph aims to help the diabetologist understand this troublesome condition.

This book offers you a brief, but very involved look into the operations in the exploitation of Oil & Gas wells that will help you to be prepared for job interview at oil & gas companies. From start to finish, you'll see a general prognosis of the production process. If you are new to the oil & gas industry, you'll enjoy having a leg up with the knowledge of these processes. If you are a seasoned oil & gas person, you'll enjoy reading what you may or may not know in these pages. This course provides a non-technical overview of the phases, operations and terminology used on offshore production platforms. It is intended also for non-drilling personnel who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of drilling operations, with a particular focus on the unique aspects of offshore operations.

This volume, emerging from a cross-national study of teachers' perception of good citizenship, addresses two fundamental questions: What do teachers see as important in citizenship education? How do these perceptions facilitate or hinder the preparation of good citizens? While providing rich and useful data on the latest developments of citizenship education in various contexts, this book also offers an all-round review of concepts and arguments on the subject, as well as insightful comparative analyses of the findings emerged from the case studies. One encouraging conclusion drawn from these studies is that teachers across nations share similar goals and objectives that seem to have transcended cultural and political boundaries.

This volume, with accompanying CD-ROM, is a compendium of information providing practical guidelines for individuals doing drug abuse research with Hispanic populations. Aimed at graduate students and researchers or service providers initiating programs with Hispanic communities, it also provides ample substance for seasoned researchers. The material is drawn from the field work of countless investigators who, in the course of conducting drug abuse research targeted at the Hispanic population, have designed studies, collaborated with communities, conducted outreach, recruited participants, developed and tested instruments, collected and analyzed data, followed up with clients and considered ways of returning something to the community after their research was completed. The CD-ROM provides not only the volume's electronic text, but also decision-tree scenarios of each major component activity to initiate and conduct research with Hispanic populations. This handbook was written largely because many drug abuse researchers in the 1980s and 90s operated under the assumption that the methods and approaches useful with non-Hispanic subjects could also be utilized with Hispanics. That approach ignored such moderating variables as acculturation, language and core values. As a consequence, the benefits of research findings did not always accrue to Hispanics. This volume contributes significantly to filling this gap in drug abuse research.

Chemistry is a human endeavor that relies on basic human qualities like creativity, insights, reasoning, and skills. It depends on habits of the mind: skepticism, tolerance of ambiguity, openness to new ideas, intellectual honesty, curiosity, and communication. Young female students begin studying chemistry curiosity; however, when unconvinced, they become skeptical. Researches focused on gender studies have indicated that attitudes toward science education differ between males and females. A declining interest in chemistry and the under representation of females in the chemical science was found (Jacobs, 2000). This study investigated whether self-confidence toward chemistry, the influence of role models, and knowledge about the usefulness of chemistry were affecting the attitudes toward chemistry, of 183 high school young females across the United States. The young female students surveyed, had studied chemistry for at least one year prior to participating in the study during the fall semester of 2003. The schools were randomly selected represented diverse economic backgrounds and geographical locations. Data were obtained using Chemistry Attitude Influencing Factors (CAIF) instrument and from interviews with a focus group of three young female students about the effect of self-confidence toward chemistry, the influence of role models, and knowledge about the usefulness of chemistry on their decision to study chemistry. The CAIF instrument consisted of a 12-items self-confidence questionnaire (ConfS), 12-items each of the influence of role models (RoMoS) and knowledge about usefulness of chemistry (US) questionnaire. ConfS was adopted (with permission) from CAEQ (Coll & Dalgety, 2001), and both RoMoS and US were modified from TOSRA (Fraser, 1978), public domain document. The three young female students interviewed, gave detailed responses about their opinions regarding self-confidence toward chemistry, the influence of role models, and knowledge about the usefulness of chemistry on their attitudes toward the study of chemistry. Both quantitative (a Likert-type Scale questionnaire) and qualitative (open-ended questions) items were used to investigate the views of young female students. Results of the survey were analysed using a correlation test. Significant differences were found in the Likert-type scale scores, providing evidences supporting literature that suggests, self-confidence toward chemistry, the influence of role models, and knowledge about the usefulness of chemistry affect the decision of young female students about the study of chemistry. Interview responses corroborated the results from the survey. Strategies for addressing the problems and recommendations for further studies have been suggested.

Petrogav International provides courses for participants that intend to work on offshore drilling and production platforms. Training courses are taught by professionals from the oil and gas industry

with current knowledge and years of field experience. The participants will get all the necessary competencies to work on the offshore drilling platforms and on the offshore production platforms. It is intended also for non-drilling and non-production personnel who work in drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. This course provides a non-technical overview of the phases, operations and terminology used on offshore oil and gas platforms. With the evolving technologies available to educators and the increased importance of including technologies in the classroom, it is critical for instructors to understand how to successfully utilize these emerging technologies within their curriculum. To ensure they are prepared, further study on the best practices and challenges of implementation is required. *Preparing Pre-Service Teachers to Integrate Technology in K-12 Classrooms: Standards and Best Practices* focuses on preparing future teachers to integrate technology into their everyday teaching by providing a compilation of current research surrounding the inclusion and utilization of technology as an educational tool. Covering key topics such as digital assessment, flipped classrooms, technology integration, and artificial intelligence, this reference work is ideal for teacher educators, administrators, stakeholders, researchers, academicians, scholars, practitioners, instructors, and students.

While many studying criminology learn to examine offenders, offending, and its consequences, few actually journey into the physical world of prisons to meet offenders face-to-face. Created specifically for criminology students and equally useful for current researchers and practitioners, this book serves as a step-by-step toolkit on how to humanely conduct research with populations in the correctional system. The authors' combined 60+ years of experience allows them to provide field-tested practical advice for researching youth and adults on probation, on parole, or incarceration. The book guides readers through practical concerns, such as gaining access and building rapport with offenders and those who monitor them; the types of correctional data that can be collected; informed consent process and research ethics; and the logistics of doing research. Through personal stories, "what if" scenarios, and case studies, as well as examples of real-world tools like checklists and sample forms, the authors share methods of how to overcome the obstacles that criminologists must face as they learn to work with those behind bars.

Approaches and methods in comparative education are of obvious importance, but do not always receive adequate attention. This second edition of a well-received book, containing thoroughly updated and additional material, contributes new insights within the longstanding traditions of the field. A particular feature is the focus on different units of analysis. Individual chapters compare places, systems, times, cultures, values, policies, curricula and other units. These chapters are contextualised within broader analytical frameworks which identify the purposes and strengths of the field. The book includes a focus on intra-national as well as cross-national comparisons, and highlights the value of approaching themes from different angles. As already demonstrated by the first edition of the book, the work will be of great value not only to producers of comparative education research but also to users who wish to understand more thoroughly the parameters and value of the field.

*Technical Interviews: Excel with Ease* has been written keeping in view the large cross-section of job-seekers and professionals belonging to the discipline of Electronics, Communication, Instrumentation, Computer Science and Information Technology.

Where many textbooks on policy research focus on methodological and statistical theories, leaving students to wonder how they will apply those theories to future policy positions, this innovative textbook takes theories of policy research and puts them into practice, demystifying the subject by translating it into real-world situations in which students can actively engage. Beginning with an orientation and overview of policy research, outlining the processes of policy analysis and evaluation from start to finish, *Applied Policy Research, 2e* walks students through an examination of case studies to demonstrate how these theories play out in real policy situations. New to this edition: A rewritten Part I that includes several new chapters incorporating the latest developments in applicable policy research design, implementation, and products to provide a framework for conducting policy research. A matrix at the start of Part II to easily identify how each of the fifteen case-study chapters correspond with concepts and topics presented in Part I, showing the reader where to

look for a specific real-life example of a given topic or concept. Each case is drawn from real instances of policy research to provide students with an opportunity to consider and learn how to grapple with the challenges posed by the needs of public programs and agencies. Cases include local, state, and nonprofit agencies as well as federal-state-local intergovernmental "hybrids." Each chapter is presented in a uniform format: (1) a detailed description of a policy research problem; (2) a discussion of the unique challenges posed by the problem; (3) a description of the policy research techniques used; (4) a summary of the outcomes or conclusions associated with the research as it was conducted; and (5) conclusions about the implications or lessons for policy research. Illustrative figures help students understand the stages of policy research, and end-of-chapter tools such as discussion questions, assignments and activities, and case studies "at a glance" help students master not only the particulars of each case but the broader skills needed in future research. *Applied Policy Research, Second Edition* will be essential reading in all policy research courses with a focus on practical outcomes and student preparation for public service.

This is the first scholarly book to explore the empowerment and the social service role of frontline police officers in the People's Republic of China. It approaches the study of role strain and empowerment, informed by local empirical data and personal experience. Thematically organized and focusing on those issues of greatest concern to the public, such as the dual social control (informal and formal) mechanism, mass line policing, strike-hard campaigns, police professionalization and professional ethics, as well as the paramilitary-bureaucratic structure in the Chinese police organization, it provides a detailed discussion of these and other contemporary issues. The book offers a valuable resource for students and researchers in the area of comparative policing and comparative criminal justice, as well as police professionals and policy-makers.

"This book provides valuable insights into the role of the CIO, his interaction within the organization and external relationships with vendors and suppliers. It emphasizes the need for balance between management and technology in the role of CIO, and focuses on this role as an expert on information technology, and a leader in the appropriate application of IT"--Provided by publisher.

Given the importance of the development of intellectualism and the need to ensure equity and access to learning experiences, educators at all levels must be aware of research-based protocols to identify, serve, and evaluate programs for diverse gifted learners. It is essential to understand how gifted education can increase equity in identification practices for historically underrepresented groups, what the specific curricular opportunities are that must be provided to learners to develop gifted programs, and what the key considerations are to the design and implementation of authentic and equitable programs for gifted learners. *Creating Equitable Services for the Gifted: Protocols for Identification, Implementation, and Evaluation* curates cutting-edge protocols in the field of gifted education related to the areas of equitable identification, implementation of services, and programmatic assessment. These protocols seek to initiate discussion and critical discourse regarding diverse gifted learners among higher education faculty, state department personnel, district administrators, and classroom teachers. Covering topics such as digital differentiation, equitable assessment, and STEM education, this text is ideal for teacher education programs, preparation programs, university degree programs, university credential programs, certificate programs, faculty, graduate students, state departments of education, superintendents, coordinators, administrators, teachers, professors, academicians, and researchers.

The 1980s and 1990s experienced a proliferation of schools implementing Computer-Based Learning (CBL) and/or Computer-Based Training (CBT) because of today's technological growth. As Technology Education (TE) continues to receive significant attention, institutions attempt to better reach the critical goal of quality education by establishing the value that needs to be added to workers and students learning and achievement with technology. Dr. Bouaffo Joseph Kouame conducted a qualitative case study on this doctoral thesis: *The Digital Divide in Cote d'Ivoire: The Impact*

of Information and Communication Technologies (ICTs) on Education. The purpose of the study was to assess the major issues that impede the progress of education and to explore the impact of ICTs on the education system in Cote d'Ivoire. The study was also intended to explore the modalities for improving the quality of knowledge, management, and leadership in Cote d'Ivoire and concluded that these objectives would be reached through ICTs.

This enlightening book presents a hypothetical evaluation case study to explore and propose tools for effective library program assessment. • A hypothetical program evaluation case study • Vignettes and examples related to the hypothetical case • Focus questions, a case application, and application questions and exercises with each chapter • End-of-chapter references • A brief glossary of common case-study terms • Appendixes of additional program evaluation materials

*The Elements of Inquiry* covers the basic guidelines for graduate students doing an investigation or inquiry project. It distills the rubrics necessary for teaching research methods and completing research projects, and gives the student researcher a list of steps to follow to complete any type of inquiry project - including formal research projects such as doctoral dissertations. It was written to support the work of students in an educational leadership doctoral program, but it will also assist the research efforts of college students at any level in any discipline. The book begins by establishing the underlying philosophical concepts upon which all good research is based, preparing students to get down to the "nuts and bolts" of conducting their own research and evaluating the research of others. Fundamental concepts and rules of research are explained both for producers and consumers of social science and educational research. Numerous practical examples illustrate the steps in the research process presented in the text. There are end-of-chapter exercises for students to apply the concepts discussed in the chapter. Templates for organizing and presenting research provide students with a game plan for success with their research. The book ends with an up-to-date annotated bibliography of beginning and advanced research texts allowing students easy access to books that detail the more specialized research topics. While most research books detail one or more method in depth, this text provides a broad introduction to many techniques and models used in doctoral dissertations, and will be of particular value to those who are consumers of inquiry studies and research reports. Key to the overview provided is the annotated bibliography that leads the reader to the next stage of understanding or doing research.

Readers of this new edition will find Expanded and updated coverage of crucial topics such as conducting a literature review, dissertation support groups, and harnessing technology to conduct research Graphics, quotes, illustrations, progress tracking tools, sample forms, a new chapter-ending resources feature, and other user-friendly elements Thoroughly updated and revised chapters with the most current need-to-know information This clear, practical guidebook will make the journey to "doctor" smoother and help you reach your academic goals. "The Dissertation Journey has been a valuable read for more than a decade. Dr. Roberts and Dr. Hyatt bring years of doctoral teaching and dissertation advising experience to this essential book." —Stuart Allen, Professor of Organizational Leadership Robert Morris University "This book contains sound academic research advice in an easy to understand and follow format. The book's benefits extend beyond the dissertation to any subsequent scholarship that the reader undertakes." —Farzin Madjidi, Associate Dean, Education Division Pepperdine University

As society continues to experience increases in technological innovations, various industries must rapidly adapt and learn to incorporate these advances. While there are benefits to implementing these technologies, the sociological aspects still need to be considered. *Technology Adoption and Social Issues: Concepts, Methodologies, Tools, and Applications* is an innovative reference source for the latest academic material on the various effects of technology adoption, implementation, and acceptance. Highlighting a range of topics, such as educational technology, globalization, and social structure, this multi-volume book is ideally designed for academicians, professionals, and researchers who are interested in the latest insights into technology adoption.

Designing and writing a qualitative dissertation methodology chapter can be done! *Qualitative Dissertation Methodology: A Guide for Research Design and Methods* functions as a dissertation advisor to help students construct and write a qualitative methodological framework for their research. Drawing from the challenges author Nathan Durdella has experienced while supervising students, the book breaks down producing the dissertation chapter into smaller pieces and goes through each portion of the methodology process step by step. With a warm and supportive tone, he walks students through the process from the very start, from choosing chairs and developing qualitative support networks to outlining the qualitative chapter and delving into the writing. By the end of the book, students will have completed the most challenging chapter of a qualitative dissertation and laid a strong foundation for the rest of their dissertation work.

A formal training program with theoretical and practical components is essential for all emergency medical personnel involved in providing care for critically injured patients. Communication, effective first aid, and on time transportation to a health center play a major role in improving quality of care for critically injured patients. Using life experience examples, participants in the study emphasized the importance of each factor on the delivery of quality care for critically injured patients. Recommendations based on the study findings included two main categories. The first category illus-

trated recommendations to stakeholders, and the second category reflected recommendations for further study. Stakeholders in this study included healthcare leaders in Afghanistan, healthcare professionals involved in providing health care in Afghanistan, and local people in Afghanistan. The modified van Kaam method in the qualitative phenomenological study involved conducting semistructured interviews, which were audio-taped and transcribed. The rationale for using the phenomenological approach in the qualitative study was to describe in-depth experiences of health care professionals. Moustakas (1994) modified van Kaam method explored the lived experiences and perceptions of 17 doctors and nurses relating to emergency trauma care for critically injured patients. Data analysis revealed important factors that could enhance the quality of prehospital care for civilian casualties of landmine and unexploded ordnance (UXO) blast injuries in Afghanistan. The four major themes that emerged from participants responses to interview questions included communication, formal training for emergency medical personnel, transportation to a higher-level center, and quality of prehospital care.

This book constitutes the refereed proceedings of the 10th European Conference on Research and Advanced Technology for Digital Libraries, ECDL 2006, held in Alicante, Spain in September 2006. The 36 revised full papers presented together with the extended abstracts of 18 demo papers and 15 revised poster papers were carefully reviewed and selected from a total of 159 submissions. The papers are organized in topical sections on architectures, preservation, retrieval, applications, methodology, metadata, evaluation, user studies, modeling, audiovisual content, and language technologies.
