Praise for the fundamental index. "The Fundamental Index® method is a controversial financial innovation in the field of passive investing, but this book confronts the whole range of controversy head on. The case for use of the Fundamental Index method and against cap-weighted indexes is uncommonly lucid, well illustrated, and attention-grabbing.

Fundamentally based indexes are indices in which stocks are weighted by one of many economic fundamental factors, especially accounting figures which are commonly used when performing corporate valuation, or by a composite of several fundamental factors. A potential benefit with composite fundamental indices is that they might average out specific sector biases which may be the case when only using one fundamental factor. A key belief behind the fundamental index methodology is that underlying c

Fundamental indexing simply costs more than capitalization-weighted indexing. The funds are not as large, and thus do not benefit as much from economies of scale. Rather than rebalancing automatically as a cap-weighted index does, a fundamental index must be rebalanced from time to time, incurring additional transaction (and tax) costs.

Fundamental Versus Cap Weighted Index Funds
It turns out that when you use the fundamental index methodologies to create an index, the net effect is to (1) lower the average size of the companies in the index relative to a market capitalization methodology, and (2) increase the value tilt of the companies in the index relative to a market capitalization methodology.
