The Green Skyscraper : Ken Yeang : 9783791319933 Ken Yeang is an architect-planner, and one of the foremost ecodesigners, theoreticians, and thinkers in the field of green design.

How Green Buildings Should Look: Ken Yeang Green architect Ken Yeang may be to skyscrapers what Buckminster Fuller was to houses. The Malaysian architect's visionary approach to green building bucks the mainstream, embracing the tall... For a hundred years the skyscraper has been the strongest of brands. Doubters have had little or no impact on architects, most of whom seem to have assumed that God put them here to erect

the tallest skyscraper, the most intelligent skyscraper, or, In the case of Ken Yeang, the greenest skyscraper. Not that I am against building high per se. Although many designers have succeeded in applying ecological or "green" design principles to architecture on the small scale, city centers remain an uncharted frontier when it comes to achieving integrated, ecologically responsive buildings. Architect Ken Yeang takes us an important step forward by addressing the challenge of making the skyscraper an "intensive" large building type ...

The Green Skyscraper: by Ken Yeang, 1999. Prestel Verlag, Munich. Paperback, 304 pages, \$29.95 The challenges presented by Ken Yeang in The Green Skyscraper start right with the cover shot—an arresting model of the Tokyo Nara Building revealing several floors of skyscraper devoted to gardens and a soft, sculptured form—and continue through most of the text.
