

# Get Free The MRCGP Clinical Skills Assessment CSA Workbook MasterPass MasterPass Series

As recognized, adventure as competently as experience very nearly lesson, amusement, as capably as accord can be gotten by just checking out a book **The MRCGP Clinical Skills Assessment CSA Workbook MasterPass MasterPass Series** plus it is not directly done, you could take even more in this area this life, roughly speaking the world.

We offer you this proper as without difficulty as simple pretentiousness to acquire those all. We offer The MRCGP Clinical Skills Assessment CSA Workbook MasterPass MasterPass Series and numerous ebook collections from fictions to scientific research in any way. accompanied by them is this The MRCGP Clinical Skills Assessment CSA Workbook MasterPass MasterPass Series that can be your partner.

## NLRVBR - WALLS HAROLD

Notes for the MRCGP This classic book has been providing help for candidates of the MRCGP exam for over 20 years. Now fully updated for UK trained doctors wishing to obtain a Certificate of Completion of Training in General Practice, this new edition covers all three required components of the integrated assessment programme. It provides sample questions for the Applied Knowledge Test (AKT), practice cases for Clinical Skill Assessment (CSA) and a guide to Workplace Based Assessment (WPBA). The chapters follow the 16 sections of the RCGP curriculum and include summaries of the current evidence base with clinical guidelines, examination tips, revision tactics, and advice on where to get support – but not just at the crucial time of exams – it includes invaluable information for GPs starting their first year in practice and helps provide the “life skills” needed to be a GP, including topics relevant for the rest of a GP’s career and their “continuing professional development” – appraisal, revalidation, managing change, teamwork, burnout, and other areas of self care.

Over the last two decades, the medical practitioner's traditional skills of history taking and examination have expanded, with a greater emphasis now placed on communication skills, and the skills required to master a range of increasingly complex procedures. This book takes the reader step by step through all of the practical techniques with which

Closely aligned to the GP curriculum and reflecting the latest format for the RCGP Membership exams, this book offers revision for the Clinical Skills Assessment (CSA) exam, which forms part of the compulsory MRCGP. Contains four practice exam 'circuits' - one of which is completely new. Each practice exam 'circuit' reflects the curriculum domains that candidates will encounter in the real CSA exam. Mirroring the CSA exam, each 'circuit' includes 13 commonly-encountered clinical consultation cases, plus a 'bonus case', offering additional preparation. Each case includes case notes, brainstorm areas, candidate and role-player instructions, and tips on what to look out for in the exam. Features unique input from Dr Peter Havelock, international consultation expert and creator of the GP Consultation model, upon which the GP curriculum is based. With editorial contribution from a successful CSA candidate, grounding the book in reality.

CSA Book Description This CSA book has been written to include over 120 common symptoms that patients can present with and may come up in your RCGP CSA exams. For each symptom a comprehensive consultation framework has been included to guide you through the best approach in dealing with the complaint. This CSA Book This CSA book guides the GP registrar to ask relevant questions within the consultations such as eliciting relevant past medical history, social history etc. The CSA framework then guides you to which examinations would be relevant and what investigations should be requested in your CSA exam. The final part of the chapter then advises about possible differential diagnoses and evidence based ways of management these. We have also written in this CSA book clear explanation briefs that you can use to explain the pertinent diagnoses to the patient in a jargon free manner. This CSA book has been specifically written to save you hours of time researching before your examinations and hopefully will become your core companion to ease you through the CSA exams and into your future as a fully fledged General Practitioner.

With over 350 Single Best Answer questions and many Extended Matching Questions, Oxford Assess and Progress: Clinical Specialties provides top-quality revision material on the core specialties for readers looking for exam success.

THE 10-MINUTE CLINICAL ASSESSMENT Clinical assessment is at the heart of medicine. Health professionals working in busy clinical settings, such as general practitioners, nurse practitioners and hospital doctors on-call, often have to assess patients under considerable time constraints. This book teaches the reader how to gather clinical information effectively, accurately and safely even when time is at a premium. Using a focused and evidence-based approach, it provides step-by-step assessment strategies for common and important clinical scenarios, particularly those that require 'lateral' and holistic thinking, such as falls in the elderly, weight loss, 'tired all the time' and assessment of diabetic or homeless people. This second edition of The 10-Minute Clinical Assessment is fully updated in line with the latest guidelines and includes brand new general chapters on focused clinical assessment, red flags, and useful consultation tools. It covers a wide range of common and important topics, including cardiovascular, respiratory, haematology, musculoskeletal, neurology, mental health, gynaecology, obstetrics, urology, ophthalmology and ear,

nose and throat. This new edition also includes sections on undifferentiated and miscellaneous presentations, on paediatrics and adolescent health; and on problems in older people. Each of the individual disease sections is uniformly structured to provide rapid reference, including: Key features of the history, including questions relevant to patients and important for making a diagnosis Common patient ideas, concerns and expectations The 'value' of present or absent symptoms for diagnosis and prognosis What should be examined, and why A summary of 'red flags' – issues that must be assessed Important differential diagnoses and their clinical features Useful tips, tricks and hints for effective patient assessment Written by an experienced medical educator and practicing GP, in consultation with a multidisciplinary team of medical students, GPs, PG trainees, hospital doctors and nurses, this title specifically covers the clinical skills assessment (CSA) part of the Membership of the Royal College of General Practitioners (RCGP) examination. New to this edition is a refreshed approach to the methodology employed in clinical assessment, to reflect recent trends in the teaching of clinical assessment. This edition also includes the latest evidence-based recommendations (including the latest NICE guidelines) and recent developments in order to provide the reader with a concise yet comprehensive resource for clinical reference.

The Clinical Skills Assessment (CSA) of the new Membership of the Royal College of General Practice (nMRCGP) examinations can be a daunting test: candidates face assessment on an unknown situation by a 'patient' and assessor, however, help is at hand. This book has been written by a CSA examiner in concert with GP training programme members to help candidates approach the exam feeling prepared, calm and in control. It includes advice on preparation, consultation skills, how the assessment is marked, and 12 practice CSA cases, along with advice on how candidates can create cases with which to practise and assess each other. Clear, practical, and based on sound knowledge and proven techniques, this book will be essential reading for nMRCGP CSA candidates. 'Rhona is a passionate and compassionate educator with a strong sense of natural justice, and also a long-standing MRCGP examiner. She has developed an approach to understanding and preparing for the Clinical Skills Assessment (CSA) that is already tried, tested and proven. An approach that will enhance the candidate's ability as a GP at the same time as preparing them for the CSA.' - Simon Gregory in his Foreword

This review book comprehensively covers most aspects of the Objective Structured Clinical Examination (OSCE). Each chapter provides a meticulous overview of a topic featured in the OSCE, including general surgery, pediatrics, psychiatry, obstetrics and gynecology, gastroenterology, geriatrics, hematology, and ethics. Common scenarios for each topic are featured in every chapter, accompanied by instructions and tips on how to take a patient's history, diagnose a patient, discuss treatment options, and address patient concerns under each scenario. Possible areas of difficulty, common candidate mistakes made, and important differential diagnosis are outlined in each chapter. The text is also supplemented with check-lists, photographs, and tables for enhanced readability and ease of use. Written by experts in their respective fields, The Objective Structured Clinical Examination Review is a valuable resource for medical students and residents preparing for the OSCE.

Part of the Masterpass series, Focused clinical Assessment in 10 Minutes for MRCGP is the definitive study guide for GP trainees at any stage of their specialist training, in particular, those preparing for the CSA. This comprehensive yet straightforward book provides a unique structure for the focused clinical assessment and a new approach to the management of everyday problems encountered in general practice, in 10 minutes. It bridges the gap between consultation theory and the real world; combining language, motivation, knowledge and empathy, enabling GP trainees to gather information, organise their thoughts, pinpoint a diagnosis and communicate this to both patient and examiner.

This new edition of the best-selling book in the CSA market continues the successful format of the first edition, but adds several new topics.

Closely aligned to the GP curriculum and reflecting the format for the RCGP Membership exams, this book offers revision for the Clinical Skills Assessment (CSA) exam, which forms part of the compulsory MRCGP. Each case includes case notes, brainstorm areas, candidate and role-player instructions, and tips on what to look out for in the exam.

This book is written as a companion guide to Cases and Concepts for the new MRCGP. The aim is help readers pull together the

knowledge and communication skills required for success in the consultation components of the new MRCGP exam, namely Clinical Skills Assessment (CSA) and Clinical Observation Tool (COT). The book does this in three ways: by demonstrating some of the required consultation skills on the accompanying DVD, which features 13 typical consultations by identifying and teaching these skills in a further 20 case write-ups - these offer readers an ordered, step-wise approach to data gathering, clinical management and interpersonal skills by giving candidates 15 'mock cases' on which to practise, either alone or in small groups - these cases cover paediatric and telephone consultations, dealing with lists, breaking bad news and home visits. The book and DVD are meant to be interactive, with some of the DVD cases being accompanied by a CSA marking schedule for readers to assess the candidate's performance. Readers are asked if the doctor on the DVD: asked the right questions, at the right time, in the right way performed the right examination correctly communicated in a precise, understandable and sensitive manner. All Specialist Trainees in General Practice will find the book helpful: ST1s will find the DVDs 1-7 most useful ST2s will find the 20 case write-ups useful for COT discussions ST3s preparing for the CSA will find the book essential, but are directed in particular to DVDs 8-13 and the Mock cases for group work This book is essential for all those preparing for the new MRCGP.

This book helps candidates pass the AKT (Applied Knowledge Test) paper in the new MRCGP. It features nearly 400 questions using all the formats featured in the AKT exam to provide the reader with the ideal exam preparation. Importantly, detailed answers are also given, complete with references to guide readers to the supporting evidence. This new edition features even more questions in every format: a total of 300 extended matching and single best answer questions over 50 algorithm completion questions including management of coeliac disease, symptoms and signs suggestive of chronic heart failure, and management of the unconscious adult over 30 picture questions, with all photographs presented in full colour "

This new edition of Cases and Concepts for the new MRCGP, now featuring over 200 "test yourself" questions, is the ideal revision guide to use alongside the practical book Consultation Skills for the new MRCGP, second edition. Featuring: for CSA, 42 typical exam cases with explanatory notes to help improve the assessment, management and interpersonal skills required for effective consulting for CbD, the models and concepts needed to demonstrate a thorough understanding of person-centred care, ethical issues, and professional codes of conduct new for the 2nd edition - over 200 questions, with explanatory answers, to test your theoretical knowledge. This book is essential reading for all those preparing for the new MRCGP.

This bundle pack of two step-by-step guides to the MRCGP AKT and CSA exams are full of valuable advice and practice questions, with an emphasis on the type of scenarios that candidates can expect to face.

'Medical technology is beneficial for well researched dangerous diseases. However, most symptoms that people bring to their primary care physician have no single clearly identifiable cause: investigations and drugs do more harm than good - and also waste resources - ' - Wilfrid Treasure Diagnosis and Risk Management in Primary Care teaches that adopting an evidence-based approach to primary care improves patient care and treatment outcomes. It demonstrates that brief clinical assessments, repeated if necessary, allow effective diagnosis while avoiding the costs and complications associated with more advanced testing. Adopting a fresh approach, this book sets consultation skills alongside evidence-based information by both itemising the specific techniques and facts that are needed in the consulting room, and providing detailed information on odds and likelihood ratios to quantify risk and deal with uncertainty. This book provides food for thought, and helps doctors develop communication skills that support their personal styles of consulting, encouraging a more traditional, intuitive treatment. It provides a map of the consultation and a compass to navigate through symptoms, signs and evidence - listening to their patients with one ear and, with the other, to the reflective inner voice of reason. General Practitioner Specialist Trainees and their teachers will find much of interest, as will established General Practitioners with an interest in maintaining traditional models of care. Undergraduate medical students and candidates for the MRCGP will find this an ideal reader for the clinical skills assessment. 'What a breath of fresh air to find an author capable of putting the patient back at the centre of the consultation and who is able to entertain at the same time as

he informs and to stimulate critical reflection while nudging us in the direction of a rigorous approach to diagnosis, and the assessment and communication of risk.' From the foreword by Roger Jones

Don't Wait Until Something Goes Wrong to Think About Your Consultation Skills Designed specifically for busy health professionals working in primary care, *The Naked Consultation: A Practical Guide to Primary Care Consultation Skills* covers all aspects of the primary care consultation in a clear, concise, and highly readable manner. The book begins by breaking the primary care consultation into its components, making it easier to focus on particular areas and practise skills such as encouraging patients to explain what's wrong, summarising and reflecting, and giving information to patients. The book then describes how to effectively use educational tools—such as videoing, random case analysis, problem case debriefing, and feedback—to improve consultations. It also explains in detail how to demonstrate proficient consultation skills in the Membership of the Royal College of General Practitioners (MRCGP) exam and the importance of these skills in appraisal/revalidation. Certified for continuing professional development (CPD®) by The CPD Certification Service, this fully updated and revised Second Edition incorporates new thinking and consultation models, including the 6 S model and the new doctor, patient, illness model. It also provides detailed analysis of the latest Royal College of General Practitioners (RCGP) assessment tools, such as the clinical skills assessment exam (CSA) and the consultation observation tool (COT). Complete with illuminating case studies, photocopyable forms, and a jargon-busting appendix, *The Naked Consultation: A Practical Guide to Primary Care Consultation Skills, Second Edition* offers valuable insight into the key phases of the primary care consultation, the best features of common consultation models, and the real-world application of popular consultation techniques.

The much anticipated practical educational manual for General Practice (GP) trainers, programme directors, and other teachers and educators in primary care has finally arrived. This extensive, full-colour guide is written by a select group of hands-on educators who are passionate and knowledgeable. The book captures their wisdom and vast experience in an accessible and practical way. Although it's aimed at GP training, there are many chapters in this book that are relevant and transferrable to teachers and educators in areas outside of General Practice (and worldwide). We are sure that GP appraisers, Foundation Year trainers and other medical/nursing student educators will find the detailed comprehensive explorations inspirational. Beautifully presented, the chapters cover a wide educational framework employing a variety of presentational methods such as flowcharts, diagrams, conversational pieces, scenarios and anecdotes. Each chapter has a corresponding webpage containing over 300 additional resources - providing practical tools as well as additional reading material. This book was awarded the Royal College of GP's 'Paul Freeling Prize' in 2013 for meritorious work in the field of General Practice education. It is also used as the foundation textbook for the Postgraduate Certificate in Medical Education (PGCE) in at least seven UK universities. The Essential Handbook for GP Training and Education adopts a relaxed, personable approach to primary care education that won't leave you with a headache.

The Clinical Skills Assessment has been developed as "an assessment of a doctor's ability to integrate and apply clinical, professional, communication and practical skills appropriate for general practice". Candidates will have to see 13 'patients' during the exam, presenting with problems that will test the doctor's skills in diagnosis, problem so

Assessment is a key method of improving standards as well as establishing competency. However, despite major developments in the assessment of clinical competence, there is still bad practice and ignorance of significant issues in this area than any other aspect of medical higher education. This book covers all aspects of assessment.

'the research which Pendleton and his colleagues have done is high class and relevant. The results are coherent, and on the whole easy to read and absorb.' The Lancet

This Second Edition of the highly popular *Clinical Skills for OSCEs* is the most comprehensive guide to basic clinical skills available, covering all the pertinent skills taught at medical school, from third year to finals. With its clear and concise, yet informative style, *Clinical Skills for OSCEs, Second Edition* is the ideal revision tool for all

Closely aligned to the GP curriculum and reflecting the latest format for the RCGP Membership exams, this book offers revision for the Clinical Skills Assessment (CSA) exam, which forms part of the compulsory MRCGP. Includes three up-to-date practice exam 'circuits' - one of which is completely new. Mirroring the CSA exam, each 'circuit' features 13 commonly-encountered clinical consultation cases. Each case includes case notes, brainstorm areas, candidate and role-player instructions, and tips on what to look out for in the exam. Features unique input from Dr Peter Havelock, international consultation expert and creator of the GP Consultation model, upon which the GP curriculum is based. With editorial contribution from a recently successful CSA candidate, grounding the book in reality. Provides 'Online Extras' in the form of video exam-

ples of consultation cases for the CSA, with advice and commentary.

This is the most comprehensive resource for candidates sitting the challenging final Clinical Skills Assessment exam, offering a complete curriculum guide as well as 110 role plays that can be removed and practised in pairs. The guidance is seamlessly aligned to the RCGP syllabus, fully up-to-date and referenced with the latest guidelines, with detailed 'model' answers to each case. Offering a new, straightforward consultation model highly suited to the requirements of the exam, the book provides: a realistic amount of information for both 'doctor' and 'patient' to closely replicate the exam the answers! Each case includes a fully worked up 'Model Consultation' summaries of guidelines and tips from the authors' recent experience of the CSA exam for all 110 cases an easy way to mark each colleague's role play attempts, with tick boxes on the Model Consultation and a universally applicable marking scheme card a colour-coded curriculum for ease of reference the only CSA casebook and revision guide providing information and answers across the curriculum. The Complete CSA Casebook is an excellent resource to prepare for a number of international examinations, including: Clinical Skills Assessment (CSA) for the RCGP (Royal College of General Practitioners). Simulated Surgery, Learning Needs Assessment, for the International GP Recruitment (IGPR) Scheme, GP Returner Scheme and GP Induction Scheme. Objective Structured Clinical Examination (OSCE) for the RACGP (Royal Australian College of General Practitioners) Fellowship. GPEP1 Clinical Examination for the RNZCGP (Royal New Zealand college of General Practitioners). The Certification Examination in Family Medicine simulated office orals (SOOs) for The College of Family Physicians of Canada." The Family Medicine Certification Examination for the ABFM (American Board of Family Medicine). and will remain an invaluable resource for best general practice after qualification.

An established key text for all doctors, this edition is completely up-to-date in regards to recent major changes in GP training and assessment.

Completely revised and including new additional material, this second edition of the bestselling *Get Through MRCGP: Clinical Skills Assessment* provides candidates with a definitive, one-stop revision resource for the CSA part of the MRCGP examination. Fully revised in accordance with the current MRCGP and MRCGP(INT) curriculum Mock examinations cover a spread of topics and skills outlined in the RCGP curriculum Comprehensive discussion of areas that stations test and detailing points needing to be covered to achieve the best results Brand new material including six new cases and task boxes to refocus the reader's attention on the different challenges of each station Completely rewritten introductory chapter Offers valuable advice on how to approach the exam, focus time in day-to-day GP surgeries and how to develop skills required to pass the CSA Written by an experienced author team that has extensive knowledge of both national and international primary care clinical skills assessment, *Get Through MRCGP: Clinical Skills Assessment, Second Edition* is essential reading for postgraduate candidates preparing for this challenging examination.

The aim of this book is to help trainees and trainers prepare for the Royal College of General Practitioners' (RCGP) Clinical Skills Assessment (CSA). The guidance and walkthrough videos will help you to gain a better understanding of the approach to physical examination necessary to meet the examination standard. In the CSA, candidates are required to select and perform the physical examination expected of a competent general practitioner within the context of a 10-minute general practice consultation. Translating that standard into practical guidance for an individual case is complex, not least due to the differences in approach that exist amongst trainees, trainers and examiners. This book provides practical guidance by summarising the consensus opinion of 293 GP trainers and 16 CSA examiners for a series of typical CSA scenarios. The findings are presented along with notes and guidance.- Dr Boeckx and Dr Marlow are experienced CSA tutors and Fellows of the RCGP and have taught on the CSA since its inception. Both tutor regularly for the RCGP and provide expert teaching on physical examination alongside senior examiners and consultation skills experts. Their work has been recognised by the RCGP with a Quality Award. If you are preparing for the CSA or helping others prepare, this book is here to help you.

This book helps readers pull together the knowledge and communication skills required for success in the consultation components of the MRCGP exam, namely the Clinical Skills Assessment (CSA) and the Clinical Observation Tool (COT). Rather than learning by rote, this book promotes a methodical, step-wise approach which will enable you to easily identify the type of case presenting, and to work out exactly what you need to demonstrate for a successful consultation. The book features a number of cases to test and enhance your skills, in three formats: 13 teaching cases- these are very detailed cases which provide you with a great deal of support and advice, including: suggested approaches to the consultation, model answers, background knowledge required, and the theoretical underpinnings of the consultation. 20 long cases- these build on the knowledge gained in the teaching cases and feature detailed analysis to help you develop an ordered, step-wise approach to data gathering, clinical management and interpersonal skills. 15 shorter practice cases- these help refine the skills you

have learnt in working through the earlier cases. These cases come with marking schemes and can be used either alone or in small groups. Once you have worked through the book and refined this methodical approach, you will be able to approach any consultation confident in the knowledge that you possess the tools to succeed. Note that this edition does not contain a DVD. The 13 video cases in the previous edition have been replaced by teaching cases.

This title is written for MRCP candidates preparing for PACES exam in UK and rest of world. Clinical examinations in the OSCE style of marked stations are daunting for all students, whether undergraduates or MRCP candidates. The recent introduction of the 5-station PACES (Progressive Assessment of Clinical Examination Skills) exam inspired a great deal of apprehension, so the appearance of the first edition of Hall's PACES for MRCP was greatly welcomed by candidates and became an immediate success. This new edition builds on the book's reputation. It provides, in one colourful and attractive volume, complete coverage of all the most common medical cases that will be covered in PACES and similar exams. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume 250 cases organised into the 5 stations of the PACES exam - respiratory and abdominal system, history taking, cardiovascular and nervous system, communication and ethics and skin, locomotion, eyes and endocrine systems Engaging question-and-answer approach at the end of each case - excellent preparation for the exam Boxed tips highlight vital information - helps identify what is most important to remember Produced in full colour throughout Colour coding for each station Many more illustrations added - now over 300 clinical photographs and line drawings in colour Many more cases added, bringing the number up to 250 - 50 per station History-taking and communication skills stations now revised so that they exactly mimic the requirements of the exam

The 3rd edition of PACES for the MRCP has been fully revised and updated throughout to retain its pole position as the textbook to accompany core medical training (CMT) and prepare candidates for success in the Practical Assessment of Clinical Examination Skills and a future specialty career. Features Fully revised for the new Station 5 and completely updated throughout. Promotes understanding and deeper learning of modern medicine applicable to PACES and the specialist registrar. Emphasis on clinical assessment - history-taking, examination and communication skills - equipping candidates with appropriate differential diagnoses from which to develop the right diagnosis. Encourages candidates to question why a diagnosis has arisen and consider its consequences. For example, 'Heat failure' is a not a diagnosis until a candidate has considered the differential diagnoses of breathlessness and decided why heart failure is most likely, and then considered its cause (not always ischaemic heart disease), its presentation (acute, chronic, left or right ventricular or both) and, most importantly, the effects of it and its treatments on a patient's life. This 3rd edition of PACES for the MRCP continues to provide fully revised, up-to-date, evidence-based coverage of investigations and treatments. Whilst the emphasis of PACES is on clinical skills, candidates who understand when, for example, a patient with rheumatoid arthritis might benefit from a biologic agent and how this will influence inflammatory disease, is better equipped for success. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume 250 cases organised into the 5 stations of the PACES exam - respiratory and abdominal system, history taking, cardiovascular and nervous system, communication and ethics and skin, locomotion, eyes and endocrine systems Engaging question-and-answer approach at the end of each case - excellent preparation for the exam Boxed tips highlight vital information - helps identify what is most important to remember Produced in full colour throughout Colour coding for each station Many more illustrations added - now over 300 clinical photographs and line drawings in colour Many more cases added, bringing the number up to 250 - 50 per station History-taking and communication skills stations now revised so that they exactly mimic the requirements of the exam

The book is based on notes written during my preparation for the MRCGP Clinical Skills Assessment (CSA) Examination. The book deals with 309 topics relevant to the CSA Examination. Acronyms used have been listed in an index in the first few pages of the book. Some of the topics are dealt with in detail while others have simple explanations only. I hope that these notes will prove useful to trainees preparing for the examination. I would encourage readers to stay updated with the latest guidelines. Best wishes to those who are preparing for the MRCGP CSA exam.

"CSA Revision Notes for the MRCGP" provides the reader with an effective framework for preparing for the Clinical Skills Assessment exam. Written by a recently-qualified doctor with fresh memories of the CSA exam, the book is an essential aid for anyone getting ready to sit the exam. The book is divided into medical subject areas and each section works through the personal, data gathering, diagnostic and clinical management skills required to pass the CSA exam. Each section finishes with role play scenarios so you can test your abilities with a colleague. The book is an essential revision source for anyone preparing for the CSA exam.

This new edition of the bestselling title features 15 new practice

cases and with the aid of the DVD, helps readers pull together the knowledge and communication skills required for success in the consultation components of the MRCGP exam, namely Clinical Skills Assessment (CSA) and Clinical Observation Tool (COT).

Succeeding in the MRCGP Clinical Skills Assessment (CSA) is an essential part of progressing through General Practice specialty training. This comprehensive revision guide is the most up-to-date available and contains a variety of cases covering the entire breadth of the MRCGP curriculum. Written by doctors who have successfully passed the MRCGP CSA exam, this book is packed with advice and tips, including guidance on topics that candidates consistently struggle with. This comprehensive MRCGP CSA revision guide describes the writers' memories of their recent CSA exams together with general adv.

This revision book for the clinical skills assessment (CSA) portion of the Membership of the Royal College of General Practitioners (MRCGP) exams includes a range of scenarios representative of those candidates will encounter, each created with direct input from an MRCGP examiner. The book enables candidates to role-play the scenarios with colleagues, providing notes for both candi-

dates and actors. The book's structure follows the scheme of the exam, covering information gathering, clinical management and interpersonal skills. It includes sections focusing specifically on the history, examination and management plan for scenarios, while table summaries help candidates to focus on key areas. Each chapter concludes with a tutorial of relevant information and a suggested reading list. 'What the authors have developed in this text is a guide to excellence in this assessment method: how it runs, how it is structured, how it is marked. Anyone anxious about performance and success in the CSA (and all of us are) will find a practical way to prepare and pass.' - from the Foreword by John Spicer

This book helps you to revise and prepare for the CSA part of the MRCGP exam. The new edition features an additional 11 clinical scenarios, all presented in the same standardised format to help you to improve your: \* data gathering - a broad range of appropriate questions to ask the patient are provided and red flags are highlighted where appropriate \* interpersonal skills - each clinical problem is described using terms that you can use in your explanations to patients \* clinical management - tells you which exami-

nations to consider, which investigations to order, and how to manage each clinical problem based on the latest guidelines and current best practice \* consultations - to help you practise, every clinical case features a realistic role play scenario, all of which have been extended with additional information in the new edition. Every clinical scenario in this new edition has been updated and new appendices have been added to cover driving and the latest DVLA guidelines, and when to suspect child maltreatment. The book is designed to be used as a workbook, with wide margins to allow you to add in your own notes, questions and other aides-memoires. Used in this way, CSA Revision Notes for the MRCGP is the ideal book to help you successfully prepare for the exam. From reviews of the first edition: "Following the glowing reviews of this book I bought it for my CSA preparation. It is a very well written book and a good resource for the CSA. I like the lay out with different case scenarios presented in the CSA style of - data gathering, interpersonal skills and clinical management. I like the open questions and focused questions for each scenario and the role play idea at the end of each case scenario. Interestingly this is the recommended read from our VTS programme."
