Any tractor pull may be called the ultimate contest between the proverbial immovable object and the irresistible force. However, National Tractor Pullers Association leads the way in brute force with jaw-dropping displays of supreme horsepower. The object of pulling is to pull the weight, which becomes progressively heavier via a machine called a sled, down the track as far as a competitor and their machine can take it.

As the tractor begins its pull, the weight is moved forward at a set rate, pushing the front of the sled farther and farther into the ground, increasing the friction that the tractor is pulling against.

Tractor Pulling during the 1950s and 60s

Tractors with the original steering shaft AND fuel tank will require this smaller starter to fit in that area. 13 tooth: The same as the 9 tooth, but with a larger drive. With the larger drive, the starter had to be moved away from the ring gear slightly using an offset mounting plate, but a larger gear makes up for that offset.
