This book focuses on the development of strategies for the successful internationalization of large and medium-sized companies. Becoming international offers important opportunities for companies of all sizes, but in an increasingly complex environment, the strategic planning involved is also a challenge. The book addresses this, putting forward suggestions that allow large and medium-sized companies to profit from internationalization. After a comprehensive introduction to internationalization and strategic planning, the authors make clear recommendations, suggesting detailed processes for developing international strategies. The book distinguishes between going global for new markets and internationalizing production and sourcing. For both, the book pro-

poses procedures for performing meaningful strategic analyses and for developing successful international strategies. Lastly, it highlights the challenges faced by international companies and discusses useful decision processes. The book offers valuable insights for company executives, participants in Executive MBA programs, and master's students.

Matt Keegan interviews artists and commissions writing to reassess the 1990s as the moment when the Democratic Party abandoned its New Deal values and swung to the right In the wake of the Trump election, artist Matt Keegan (born 1976) began investigating the Democratic Party's shifts over recent decades. In the late '80s, members of the Democratic Leadership Council successfully moved the party's platform to the right by including a pro-business, pro-military, interventionist agenda, and downplaying social infrastructure as a calculated break from its New Deal-era foundation. This shift led to Bill Clinton's consecu-

tive terms. 1996 captures this pivotal time in American politics and society through the experience of artists who completed their undergraduate studies in that year and voted for Clinton, and others who were born in 1996 and voted for the first time in 2016. Essays focus on cultural and ideological shifts from that time, such as the 1994 Crime Bill, 1996 Immigration Act, the Telecommunications Act, the start of Fox News and beyond.

DESPERATE TRAVELERS: A novel of adventure following the desperate travels of a Central American mother and her three-year-old daughter who cross the southern U.S. border seeking asylum just to live. Immediately incarcerated they are shuffled from one detention center to another

across the country. Ultimately separated, they seek reunification against all legal odds. Encountering a Nun and a Priest who hide and shelter them, the characters discover that they are simultaneously traveling a spiritual path with desperate challenges. Based on factual circumstances potentially experienced by migrants the novel is lived by fictional characters. Their perilous paths intertwine within the system of conflicted employees of the Migrant Industrial Complex who are seeking to maximize corporate profits. The book braids together the characters' frazzled lives with compassion and love. Through the dark clouds of societal fears, hatreds, racism, and greed, this novel filters rays of sunlight and hope on all of us who are desperate travelers.

ments in American automotive history. Year-by-year reviews and detailed specifications of more than 50 makes of automobiles and over 24,000 individual models. Special color-photography sections highlight more than 160 of the most-spectacular American cars of the past eight decades.

Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys - half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work - wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV

series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore – to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished – with a foreword by Sir David Attenborough. After all, it was he who gave them that film.

And in this new and stunning book, New York Times best-selling author David Fedoso (The Case Against Barack Obama) provides the much-needed exposé of an administration that has brought Chicago-style corruption and strong-arm politics to Washington, looking to reward its friends (the unions, federal workers, and other liberal interest groups) and punish its enemies (the private sector workers and taxpayers who foot the bill for Obama's massive expansion of the federal gov-

ernment).

CD-ROM contains full text for all the procedures available in the manual. Files are provided both as fully formatted Word 6.0 (.doc) documents and as text-only documents (.txt).

That Marcello Gandini is one of the greatest of automobile designers ever has never been disputed, and whether he is the greatest ever, only time and the directions automobile design takes, will tell. But there is no doubting Marcello Gandini's immense impact on automobile design in the last four decades of the 20th century that still remains valid well into the 21st century. the Lamborghini Miura to the Maserati Quattroporte IV, the humble Innocenti Mini to the epic Cizeta V16T, Marcello Gandini has designed some of the most epochal of all automobiles. Iconic cars like the first-generation BMW 5 Series, the Audi 50/VW Polo, the Fiat X1/9, the Lamborghini Countach and the Diablo, the Lancia Stratos, the Renault Magnum super truck, and many others have all flowed his stylistic pen. -- Designing automobiles that really defined the late 1960s, 1970s, 1980s, even the 1990s, Marcello Gandini is, arguably, the one man who had the greatest

impact, the one who changed automotive design the most.

This technical book presents in a concise and concentrated form all the essential aspects of operating a ship. These include the basics of buoyancy and propulsion technology, ship safety, occupational safety and environmental protection on board as well as important auxiliary equipment. These aspects are explained in more detail using numerous examples. The book is intended for ship's engineers at university, on board and in shipping companies as well as for design engineers in the shipyard. This book is a translation of the original German 1st edition Schiffsbetriebstechnik by Manfred Pfaff, published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2018. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related tech-

nologies to support the authors.

The Volkswagen Beetle is the most successful car in the history of the automobile and over twenty million examples have been built. Conceived by Adolf Hitler in the spirit of the Model T Ford and designed by Ferdinand Porsche in the 1930s, the Beetle did not enter series production until 1945, after the ending of the Second World War. Its familiar but unconventional lines have since become recognisable throughout the world and, incredibly, it is still being built at VW's Mexican factory. This edition brings the story up to date and charts the arrival and evolution of the New Beetle, visually inspired by the original, which appeared in 1998. About the author Jonathan Wood is a founder member of the staff of Classic Cars, the magazine which gave its name to the movement. He is the author of some 35 books, which include an acclaimed history of the Volkswagen Beetle. Other titles for Shire by this author are: The Bean Austin Seven The Citroen The Bullnose Morris Classic Cars The Model T Ford The Rolls-Royce

Design of cognitive systems for assistance to people poses a major challenge to the fields of robotics and artificial intelligence. The Cognitive Systems for Cognitive Assis-

tance (CoSy) project was organized to address the issues of i) theoretical progress on design of cognitive systems ii) methods for implementation of systems and iii) empirical studies to further understand the use and interaction with such systems. To study, design and deploy cognitive systems there is a need to consider aspects

of systems design, embodiment, perception, planning and error recovery, spatial insertion, knowledge acquisition and machine learning, dialog design and human robot interaction and systems integration. The CoSy project addressed all of these aspects over a period of four years and

across two different domains of application - exploration of space and task / knowledge acquisition for manipulation. The present volume documents the results of the CoSy project. The CoSy project was funded by the European Commission as part of the Cognitive Systems Program within the 6th Framework Program.
