1: Ocean The oceans may well be Earth's final frontier. These dark and sometimes mysterious waters cover 71 percent of the surface area of the globe and have yet to be fully explored. Under the waves, a watery world of frail splendor, foreboding creatures, vast mountains, and sights beyond imagination awaits. Now this powerful resource has been developed for three educational levels! Learning about the oceans and their hidden worlds can be exciting and rewarding — the abundance and diversity of life, the wealth of resources, the latest discoveries, and the simple mysteries that have intrigued explorers and scientists for centuries. A better understanding of our oceans ensures careful stewardship of their grandeur and beauty for future generations, and leads to a deeper respect for the delicate balance of life on that God created on planet Earth. Quarter 2: Astronomy The universe is an amazing declaration of the glory and power of God! Beautiful and breathtaking in its scale, the vast expanse of the universe is one that we struggle to study, understand, or even comprehend in terms of its purpose and size. Now take an incredible look at the mysteries and marvels of space in *The New Astronomy Book!* If you watch the stars at night, you will see how they change. This speaks to the enormity and intricacy of design in the universe. While the stars appear timeless, they instead reflect an all-powerful Creator who speaks of them in the Bible. Many ancient pagan cultures taught that the changing stars caused the seasons to change, but unlike these pagan teachings, the Book of Job gives credit to God for both changing stars and seasons (Job 38:31-33). When Job looked at Orion, he saw about what we see today, even though he may have lived as much as 4,000 years ago. Quarter 3: Weather From the practical to the pretty amazing, this book gives essential details into understanding what weather is, how it works, and how other forces that impact on it. Learn why storm chasers and hurricane hunters do what they do and how they are helping to solve storm connected mysteries. Discover what makes winter storms both beautiful and deadly, as well as what is behind weather phenomena like St. Elmo's Fire. Find important information on climate history and answers to the modern questions of supposed climate change. Get safety tips for preventing dangerous weather related injuries like those from lightning strikes, uncover why thunderstorms form, as well as what we know about the mechanics of a tornado and other extreme weather examples like flash floods, hurricanes and more. A fresh and compelling look at wild and awesome examples of weather in this revised and updated book in the Wonders of Creation series! Quarter 4: Mineral Minerals are a gift of God's grace. Every day we touch them, seeing the diamond in an engagement ring or a copper chain with a cross on it. Minerals are touched on in video games like Minecraft® and Mineral Valley™, making them more a part of our daily experience. Salt, one vital mineral, helps maintain the fluid in our blood cells and is used to transmit information in our nerves and muscles. Also, Jesus told his followers that we are the salt of the earth (Matthew 5:13), something thus needed for health and flavor. Here is a God-honoring book that reveals the first mention of minerals in the Bible, symbolic usages, their current values in culture and society, and their mention in heaven.

This updated revision guide has tips and examiners' comments on preparing for and sitting the exam, explanations of how case studies should be used and guidance on how to approach the decision-making paper. There are also short questions and practice exam questions with answers.

Make Waves encourages readers to step up and be the one to initiate change in their work and lives. Author Patti Johnson walks readers through the tools and techniques that they can use to create change in their own situations. Johnson elaborates on these tools even further to give readers a sense of how to encourage and instill these "wave-making" behaviors in others within their organization. Using several diverse case studies as illustrative examples, *Make Waves* highlights the important steps that individuals at any level can take toward positive change. By reinforcing readers' desires to contribute and make a difference, Johnson connects on an individual level and bridges the gap between that desire and the actions necessary to realize bigger changes. Change can be big or small. It is the act of stepping up that Johnson embraces, as well as the ripple effect on those around. Interviews with famous Wave Makers, as well as everyday people, illustrate why it is important to be the one to start change. Wave Makers profiled include: Clint Hurdle: Manager of the Pittsburgh Pirates; believes in positive attitude and culture and changes the MLB clubhouse; this year leading the Pirates to their first winning season since 1992. Charley Johnson: Started Pay It Forward foundation. Joe Nussbaum: Started Big Event at Texas A&M when in college in the '80s and has continued to grow; largest one-day college community service day in the country and has been adopted by over seventy universities. Emma Scheffler: High school soccer player who started Insulin Angels, a nonprofit for children diagnosed with diabetes, after her own diagnosis; feared her dream of college soccer was over, so engaged other students and local hospitals after thinking about how to make her diagnosis a positive. Allen Stephenson: Started Southern Tide at twenty-two-years old when in med school and followed a passion to create a clothing line; built momentum by creating interest and participation on southern college campuses; they are now growing rapidly and it started with a great polo shirt.
