From telephone customer research to ethnographic observation, a good researcher needs to constantly adapt and objectively analyse. An excellent researcher is seeking to explore more and to rummage around for other possibilities.

Basically, research is a study, an investigation or inquiry undertaken to improve or add to ones knowledge; add to existing knowledge or to prove or disprove a hypothesis.

Good research uses well-designed experiments, includes adequate controls, and leads to solid interpretations. The conclusions drawn from good research enable accurate predictions to be made, and can easily be related to existing bodies of other knowledge. Future experiments can build successfully upon what is established from good research.

The main characteristics for good quality research is listed below: It is based on the work of others. It can be replicated and doable . It is generalisable to other settings.
