Taking too much acetaminophen (Tylenol, others) is the most common cause of

acute liver failure in the United States. Acute liver failure can occur after one very large dose of acetaminophen, or after higher than recommended doses every day for several days.

In regard to understanding contemporary security and development challenges, the concept of state failure is of mixed use. On the one hand, a normative definition of the state, which is understood as a means and not a consequence of development, does not take into account that security and political goods can be provided by informal actors. [66]

The causes of Africa's failed states must be researched within those states. External relations of dependency and neocolonialism have aggravated their situation but are not the main causes. the world's leading open access website for students and scholars of international politics

When States Fail: Causes and Consequences . Prof. Robert Rotberg John F. Kennedy School of Government. September 24, 2003. The terms "failure" and "collapse" are often used synonymously to describe states in the midst of debilitating turmoil.

Nation-states fail when they are consumed by internal violence and cease delivering positive political goods to their inhabitants. Their governments lose credibility, and the continuing nature of the particular nationstate itself becomes questionable and illegitimate in the hearts and minds of its citizens.

### **Failure cause - Wikipedia**

A failed state is a political body that has disintegrated to a point where basic conditions and responsibilities of a sovereign government no longer function properly (see also fragile state and state collapse). A state can also fail if the government loses its legitimacy even if it is performing its functions properly.
