On Good Ground was first published in 1951. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. Besides providing a vivid yet scholarly account of a religious order, this book reflects much of the regional history of the area where the nuns have done their work. The order maintains the College of St. Catherine and numerous other institutions in Minnesota and North Dakota.

Dealing in a casino presents challenges and rewards not seen in many workplaces. With hundreds of thousands of dollars at stake every minute, table games pits are high-stress workplaces. Managing a workforce of dealers and attending to the needs of players brings stresses of its own. In 2015, the University of Nevada, Las Vegas's Center for Gaming Research received a grant from the UNLV University Libraries Advisory Board that enabled it to undertake an oral history project intended to capture the stories of table games managers, including both those currently working in the field and those who have retired. Drawn from these interviews, Tales from the Pit provides an overview of how the interviewees felt about a variety of topics, ranging from their experiences breaking in as new dealers to their transitions to management and the changes the industry has seen over their careers. The current and former managers speak candidly about the owners, bosses, dealers, and players who made each day challenging. This book illuminates the past several decades of casino history through the words of those who lived and made it.

This practical guide offers mental health professionals a detailed, step-by-step description on how to conduct Parent-Child Interaction Therapy (PCIT) - the empirically validated training program for parents with children who have disruptive behavior problems. It includes several illustrative examples and vignettes as well as an appendix with assessment instruments to help parents to conduct PCIT.

What is the contemporary legacy of Gramsci's notion of Hegemony? How can universality be reformulated now that its spurious versions have been so thoroughly criticized? In this ground-breaking project, Judith Butler, Ernesto Laclau and Slavoj Žižek engage in a dialogue on central questions of contemporary philosophy and politics. Their essays, organized as separate contributions that respond to one another, range over the Hegelian legacy in contemporary critical theory, the theoretical dilemmas of multiculturalism, the universalism-versus-particularism debate, the strategies of the Left in a globalized economy, and the relative merits of post-structuralism and Lacanian psychoanalysis for a critical social theory. While the rigor and intelligence with which these writers approach their work is formidable, Contingency, Hegemony, Universality benefits additionally from their clear sense of energy and enjoyment in a revealing and often unpredictable exchange.

The second in a projected four-volume series that will cover the history of the Army Medical Department from 1775 to 194 1, this volume traces the development of the department from its establishment on a permanent basis in 1818 through the final days of the Civil War in 1865. The uninterrupted existence of the Medical Department after 1818 made possible the gradual transformation of its staff from a collection of physicians of varying skills and attitudes into a group of highly trained and disciplined medical officers, proud of their organization and of their roles in it. Although the state of the art of medicine before 1865 gave the military surgeon few effective weapons against stillness and infection, after 1818, as this most recent volume in the series demonstrates, the length of the military career of the average medical officer and his professional attitude toward the challenges he met led him to concentrate his efforts on the Army's health problems and to work persistently to improvise ways in which to meet them. The Army Medical Department, 1818-1865 is, like its predecessor, a significant and long-needed contribution to the history of military medicine.

Combines in one volume "Technics and Language", in which anthropologist Leroi-Gourhan looks at

prehistoric technology in relation to the development of cognitive and linguistic faculties, and "Memory and Rhythms", which addresses instinct and intelligence from a sociological viewpoint.

The landmark text about the inner workings of the unconscious mind—from the symbolism that unlocks the meaning of our dreams to their effect on our waking lives and artistic impulses—featuring more than a hundred images that break down Carl Jung's revolutionary ideas “What emerges with

great clarity from the book is that Jung has done immense service both to psychology as a science and to our general understanding of man in society.”—The Guardian “Our psyche is part of nature, and its enigma is limitless.” Since our inception, humanity has looked to dreams for guidance. But what are they? How can we understand them? And how can we use them to shape our lives? There is perhaps no one more equipped to answer these questions than the legendary psychologist Carl G. Jung. It is in his life's work that the unconscious mind comes to be understood as an expansive, rich world just as vital and true a part of the mind as the conscious, and it is in our dreams—those personal, integral expressions of our deepest selves—that it communicates itself to us. A seminal text written explicitly for the general reader, Man and His Symbols is a guide to understanding the symbols in our dreams and using that knowledge to build fuller, more receptive lives. Full of fascinating case studies and examples pulled from philosophy, history, myth, fairy tales, and more, this groundbreaking work—profusely illustrated with hundreds of visual examples—offers invaluable insight into the symbols we dream that demand understanding, why we seek meaning at all, and how these very symbols affect our lives. By illuminating the means to examine our prejudices, interpret psychological meanings, break free of our influences, and recenter our individuality, Man and His Symbols proves to be—decades after its conception—a revelatory, absorbing, and relevant experience.

Presents a behind-the-scenes account of NASA's ambitious and sometimes tumultuous involvement with Russia's problem-plagued Mir space station over three years.

Now on Netflix as a 4-part documentary series! “Pollan keeps you turning the pages . . . clear-eyed and assured.” —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs—and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, How to Change Your Mind is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

"The complete technical manual and troubleshooting guide for motorhomes, travel trailers, fifth wheels, folding campers, truck campers, and vans"--Notes.

In this classic satire of small-town America, a young newlywed encounters bigotry, hypocrisy, and complacency when she attempts to transform Gopher Prairie, Minnesota, into a place of beauty and culture.

2018 Outstanding Academic Title, selected by Choice Recovering Native American Writings in the Boarding School Press is the first comprehensive collection of writings by students and well-known Native American authors who published in boarding school newspapers during the late nineteenth and early twentieth centuries. Students used their acquired literacy in English along with more concrete tools that the boarding schools made available, such as printing technology, to create identities for themselves as editors and writers. In these roles they sought to challenge Native American stereotypes and share issues of importance to their communities. Writings by Gertrude Bonnin (Zitkala-Sa), Charles Eastman, and Luther Standing Bear are paired with the works of lesser-known writers to reveal parallels and points of contrast between students and generations. Drawing works

primarily from the Carlisle Indian Industrial School (Pennsylvania), the Hampton Institute (Virginia), and the Seneca Indian School (Oklahoma), Jacqueline Emery illustrates how the boarding school presses were used for numerous and competing purposes. While some student writings appear to reflect the assimilationist agenda, others provide more critical perspectives on the schools' agendas and the dominant culture. This collection of Native-authored letters, editorials, essays, short fiction, and retold tales published in boarding school newspapers illuminates the boarding school legacy and how it has shaped, and continues to shape, Native American literary production.

This introduction to the field of urban design offers a comprehensive survey of the processes necessary to implement urban design work, explaining the vocabulary, the rules, the tools, the structures, and the resources in clear and accessible style. Providing a comprehensive framework for understanding urban design principles and strategies, the author argues that urban design is both a process and a collaboration in which the different forces involved are knit together. Moving from the regional scale down to the scale of places, the book examines the goals and strategies of the urban designer from the viewpoints of the private sector, public sector, and community. The text is illustrated throughout with photographs and drawings that make theory and practice relevant and alive.

This is the first comprehensive history of films made in or about Iowa. It reflects some twenty years of collecting, lecturing, and talking with some of Iowa's current generation of independent filmmakers. It covers the span from 1918 to 2013 and gives important background information on dozens of high profile films such as the STATE FAIR films of 1933 and 1945, THE BRIDGES OF MADISON COUNTY, FIELD OF DREAMS, and many others. It is designed as a companion for the State Historical Society's blockbuster "Hollywood in the Heartland" exhibition in Des Moines that is scheduled to run at least through 2016. The book has an interpretive essay covering the entire history as well as paragraph length descriptions of each film. A user-friendly feature is the Index of Films, which makes it easy to locate discussions of individual films. Marty Knepper is a featured commentator on video screens in the "Hollywood in the Heartland" exhibition.

"... will draw a wide readership from the ranks of literary critics, film scholars, science studies scholars and the growing legion of 'literature and science' researchers. It should be among the essentials in a posthumanist toolbox." -- Richard Doyle Automatic teller machines, castrati, lesbians, The Terminator: all participate in the profound technological, representation, sexual, and theoretical changes in which bodies are implicated. *Posthuman Bodies* addresses new interfaces between humans and technology that are radically altering the experience of our own and others' bodies.

*Auto Repair For Dummies*, 2nd Edition (9781119543619) was previously published as *Auto Repair For Dummies*, 2nd Edition (9780764599026). While this version features a new *Dummies* cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance

on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

During the Second World War, Indigenous people in the United States, Australia, New Zealand and Canada mobilised en masse to support the war effort, despite withstanding centuries of colonialism. Their roles ranged from ordinary soldiers fighting on distant shores, to soldiers capturing Japanese prisoners on their own territory, to women working in munitions plants on the home front. R. Scott Sheffield and Noah Riseman examine Indigenous experiences of the Second World War across these four settler societies. Informed by theories of settler colonialism, martial race theory and military sociology, they show how Indigenous people and their communities both shaped and were shaped by the Second World War. Particular attention is paid to the policies in place before, during and after the war, highlighting the ways that Indigenous people negotiated their own roles within the war effort at home and abroad.
