History. WordPress was born out of a desire for an elegant, well-architected personal publishing system built on PHP and

MySQL and licensed under the GPL. It is the official successor of b2/cafeblog. WordPress is modern software, but its roots and development go back to 2001.

First World War Hidden History

WordPress is the most popular content management system on the planet. With over 37.6% of websites running on this platform, we thought we would look at the history of it, how it transformed from a simple blogging system into its current form, how its community was born, and the ecosystem around WordPress.

By this time WordPress had already become the most popular CMS in the world. In December 2013, WordPress 3.8 was released which introduced MP6, the new WordPress admin interface. This new interface was responsive and was aimed to provide a better user experience to users, on any device or screen size.
